Yes 2.6%
No - 97.4%

Program Requirements & Reccomendations

02. Please type in your answers to the questions below. (Note: 500 character maximum for each question)

a. What specific preparation should future students do prior to participating in this program?
- Read up on Pod-Med Biomechanics Surgery and Radiology
- look over podmed notes
- The same that you did last year for CFAC
- NONW
- Just be ready to trim a lot of toenails
- ALL ASPECTS OF PODIATRY
- clinical review
- Study
- review everything
- review pod med notes surgery trauma radiology
- none
- review history and physical skills
- review charting
- NA
- basic podiatric clinic exam and notes writting
- review charting
- none
- abx and derm
- study notes
- must know antibiotics

- Look over how to write notes
- Review primary foot care
- study medications
- Normal school rotation of clinic use your judgement
- primary podiatric skills
- Go over Pod Med skills Dr. Caldwells pod med notes Biomechanic notes and surgery notes
- Go over Pod Med skills Dr. Caldwells pod med notes Biomechanic notes and surgery notes
- None
- charting
- No prep is needed
- taking a good H P and good charting as well as basic podiatry biomechanics and surgical review
- taking a good H P and good charting as well as basic podiatry biomechanics and surgical review
- taking a good H P and good charting as well as basic podiatry biomechanics and surgical review
- na
- Practice presentation and manual skills
- same as 3rd year CFAC
- School rotation Cleveland patient base
- review biomech
- biomechanics surgery - post-op
- na
- Learn how to write a proper note. Study your drugs.
- brush up on your drug formilaries
- clinical skilss charting
- know how to write notes and treat patients
- whatever u did before
- Pod med review
- none
- Pass all retakes avoid short clinicians
- know cfai charting
- ABX Classnotes
- hand calesthenics to limber up so they can bust crumblies
- Read
- study
- nothing
- Templates for teh soap notes to help with charting
- study your drugs and general pod med skills
- study your drugs and general pod med skills
- study cpc materials and any addl reading for podiatry
- ocpm classes
- none
- none
- none
- Complete 3rd year literacy nail cutting
- Bring your nail nippers!
- everything including charting system
- H P skills practice cutting toe nails
- Students should review their pharmacology pocket podiatrics pathology and dermatology.
- antibiotics classifications usual CFAC stuff
- none
- know drugs
- review surgical cases and patient care
- general knowledge
- nothing
- NA
- primary care
- 0
- routinue podiatry
-
- pod-med biomechanics and surgery preparation
- pod-med biomechanics and surgery preparation
- None
- prepare for cpc
- Be knowable of common diabetic foot problems onychomycosis and different topical and oral meds
- Primary care podiatry
- na

- Dont take shortcuts. Do the proper ways.
- na
- none
- Make sure how to manage notes with patients
- read
- study podiatric skills
- None
- review materials from each 3rd year rotation
- Build up forearm stregnth
-
- na
- 0
- Get some medication to keep them calm.
- knowledge
- Brushing up on Pod Med 2 antibiotics isnt a bad idea and how to do an arthrometic exam.
- Brushing up on Pod Med 2 antibiotics isnt a bad idea and how to do an arthrometic exam.
- know how to debride nails and calluses
- Pod med and biomechanic topics
- NA
- read pod-med notes
- none
- none
- none
- Get ready to work hard
- know how to write a good SOAP note
- Be proficient in clinic
- na
- pay attention in class
- Review pod med notes and common pod med drugs
- Look over drugs
- none
- review everything you learn
- History and Physical
- Antibiotic Use
- computer program understanding
- computer program understanding
- pod med bio mech surgery
- all pod med prep
- read
- everything
- writing notes and presenting
- none
- clinic
- know anatomy and classifications
- none
- be prepared for long hours of clinic
- normal clinic stuff
- basic clinical skills
- none
- class notes
-
- Study class notes learn how to write note
- diabetic foot care
- none
-
- Clinic skills
- review SOAP
- review how to use the computer system
- review how to use the computer system
- review antibioticsbiomechanics notesdiabetic foot infections
- Nothing its the school program if they dont know by now its pointless
- Pod med skills pharmacology
- pocket pods
- stay current with clinical knowledge
- Nothing

- Nothing
- nothing
- none
- Nothing
- Surgery Skills
- see pts all day
- read over third year notes pod med notes and Dr. Caldwells lecture on pharmacology
- Be able to work-up a clinical patient thoroughly and in an efficient manner
- na
- na
-
- read pocketn podiatrics
- know history and physical know how to treat common patient problems
- None
- None
-
- Review drugs.
- study notes
- Mediasite CPCs
- Review Mediasite lectures
- -
- Study when you can. Review surgical procedures before attending them by doing this you can impress the surgeon and learn!
- Know pharmacology and pod med
- Know pharmacology and pod med
- Know pharmacology and pod med
- Know pharmacology and pod med
- none
- NA
- 0
- none
- Read notes
- Study wound care and bread and butter podiatry
- Instruments
- Instruments
- none
- studey
- studey
- Learn how to see patients as a 3rd year and be efficient at charting
- school noted
-
- study pod med and surgery
- read up on ABx
- read up on ABx
- Review antimicrobial drugs
- none
- Review Podiatric Medicine I II class notes.
- study old notes
- study old notes
- review your class notes
- podiatric clinical skills
- Know your notes
- Study drugs
- All of Podiatry
- Learn the computer charting system
- review pod med notes
- Be prepared to teach 2nd and 3rd year students not to cut anyone. You must have patience with your fellow students
- Know antibiotics and drugs for Dr. Caldwell biomechanics for Dr. Spencer
- pay attention
-
- none
- prepare for mind games amongst OCPM Faculty
-
-

- class notes
- class notes
- class notes
- read class notes in pod med skills
- study
- review pod med II notes and biomechanics
- none
- none
- na
- reveiw pod med and surgery
- Be familiar with the up to date nail debridement techniques
- study
- study
- review pod med drugs
- none
- nothing
- bring study materials
- Review Blazers note writing lecture. Make sure you dont forget ANYTHING in the note.
- study stuff
- study pod med
- none
- pod med notes
-
- nail debridement
- know how to cut nails
- Sharpen your nail nippers
- Pod med notes

- Pod PE skills
- 000
- none
- know anatomy
- have instruments
- general studying
- none
- Reveiw surgery notes
- Review medications
- basic podiatry
- na
- none
- Study hard do well in classes.
- general
- Know CFAI clinical proceedure
- Nothing
- working up patients
- General
-
- Study Podmed

- be sure to review notes on charting!
- learn how to type notes
-
- None
- nail clippers
- Study basic podiatry
- NA
- review Midtown charting policy
- review Midtown charting policy
- Review basic pod med
-
- None
- Pod Med Sx
-
- Clinic skills
- Prism Crozar Mcglamry
- nothing
- know your drugs
- go to class
- Learn how to treat 3rd years like crap
- na
- be able to perform complete lower extremity exam
- File your nail clippers make sure you have all instruments
- none
- none
- wound care nails
- read pod med 2 notes
- Bring something to read only saw patients on tuesday and thursday
- nothing
- none
- Know how to cover full pedal exam. Linking pathology to patient..hands on experience
- Be able to communicate properly with patients
- study charting
- study charting
- caldwells stuff
- na
- Nails
- Read general medicine manuals
- Read general medicine manuals
- charting

b. What instruments or materials were you required to bring?
    - You will need all your instruments including blood pressure cuffs
    - all
    - All
    - Typical Instruments and white coat
    - All of them
    - NONE
    - all
    - All podiatric instruments
    - everything
    - all instruments
    - all of them
    - neurological exam tools bp cuff debridement tools
    - all of them
    - the ones you bought thru school
    - nail nippers monofilament drimel scalple
    - all of them
    - all clinic instruments
    - all your instruments
    - all instruments
    - all instruments

- nail nipper and all required clinic instruments
- clinic instruments

c. What were your chief responsibilities on this program?
- Management of patients at CFAC
- primary care of patient
- See patients
- Same as third year
- Evaluate and treat the patient for that particular day
- DID ALL EXCEPT SKIN PROCEDURES
- see patients diagnose and treat
- See patients
- diagnose and treat patients
- primary patient care
- to see patients
- primary care of patient foot problems
- be on time see patients come eager to learn
- see and treat pt
- seeing podmed patients
- evaluating and treating patients in clinic generating charts
- treat patients teach third years
- treating patients and charting
- evaluate patients and present to the attendings
- To work and present to the attendings as if you were a resident
- Evaluating assessing treating patients
- Treating patient
- see patients
- Take care of patients and present
- full patient encounter
- HP present patient then treat
- HP present patient then treat
- See patients in clinic
- see patients in clinic

- see patients in clinic
- see patient in clinic
- seeing patients assisting 3rd year students finishing notes by the end of the day
- seeing patients assisting 3rd year students finishing notes by the end of the day
- seeing patients assisting 3rd year students finishing notes by the end of the day
- clinic
- patient primary carecharting
- seeing pts in clinic
- See patient and formulate treatment plan
- see patients
- treatig all patients
- being acurate
- See patients in the clinic
- seeing patients presenting them to faculty and treatment
- charting routine care
- see clinic patients
- see patients
- Treat patients
- see patients
- babysitting keeping mouth closed while clipping finding out sexual orientation of 95 yr old nuns
- see patients
- seeing pts and write notes
- fixing the flux capacitor
- See patient
- See patients and present to attendings
- patient care
- see patients in clinic
- see patients and treat
- see patients and treat
- see patients in clinic
- assess patients
- seeing patients and presenting to attendings
- seeing patients and presenting to attendings
- seeing patients and presenting to attendings
- nail debrider arts and crafts

d. What were the most valuable learning experiences of this program?
    - The morning CPCs were very helpful
    - infectious diease
    - Seeing patients
    - Treating patients from start to finish
    - Get a lot of work on how to take better history and how to go about treating a patient after diagnosing what could be wrong
    - I NEED TO STUDY MORE
    - lots of patients
    - seeing patients
    - good blend of biomechanics and general podiatry
    - taking patients
    - not sure
    - hands on experience treating patients
    - case presentations
    - charting
    - the diversity of the education
    - Interview style problems
    - teaching
    - developing clinic skills
    - diabetic foot care
    - academic based
    - Lectures with Dr. Chiunda
    - More specific methode of treatment
    - cpc
    - Patient contact and treatment
    - primary skills improved
    - Podiatric skills
    -
    - Patient interaction
    - CPC w caldwell

e. What aspects of this program need improvement and/or attention? Please make suggestions.
- Institute more interactive CPCs about trauma cases
- none
- I think it is much better this year since we see more than 1 patient a day.
- CPC Scheduling
- The timing of the rotation. Really kept us busy so we were seeing maybe 5 patients before getting a chance to type up the note for the 1st patient. Really hard to keep everyones history inline
- CLINIC AND SURGERY WAS A LOT OF FUN
- more computers to type notes
- None
- need to see more patients other than palliative care patients
- none
- not sure
- increase in patient volume
- CPCs made on time and kept on schedule
- More time spent with attending while treating patient
- only one senior needed on MWF the resident is there too
- need x-ray up and running
- none
- Working with a 3rd year student and a 4th year student as a partner
- none
- at times not enought students to see the patients in a timely manner
- patient variety
- a more user friendly charting program would make life easier
- none
- need to see more patients
- a little bit more focus on real life training
- More CPCs with major case and treatment options
- none
- more patients
- none
- There isnt a lot of surgery opportunity
- more diverse patient population
- patient variety
- None
- TOO much down time
- Percentage of tuition: instruments-5 food at cafeteria-20 Spencer-Brock interaction priceless.
- nail care

- Schedule should be compatiable to the # student drs.
- Do not make Seniors babysit Juniors! That was a complete waste of my time.
- none
- Faster turnover with Patients
- none
- nothing
- none
- moving through patient visits in a timely and efficient manner
- none
- need to focus on the chief complaint more instead of the whole physical exam
- Lack Trauma Pediatrics. Notes are too detailed where they should focus on the CC everyone by now understands to write a thorough note but should be more focused where we had limited time to finish notes: during our lunch times. Also they started not givi
- scheduling
- none
- no comment
- less cc and more interesting cases
- scheduling
- None
- more patients with more variety
- Need a wider variety of patients
- wider increased patient selection
- Maybe more product educationCPC is needed.
- none
- The patient load. Students in the first couple of months had to work everyday and often stay late.
- more pts
- none
- Sometimes impossible to get all charts done by afternoon session and often seeing patients through lunch time and not being allowed to have a lunch break.
- The secretaries need to quit calling for patients when all of the rooms are full.
- more didactics
- More attention needs to be focused on the patient and patient care with the note being second. Its redicilous that more attention is given to documentation than to the patient!
- none
- Cant think of anything right now.
- They need to fix taking radiographs the system now is poor and slows down the whole clinic.
- greater variety of pathologies
- SEE 2C
- no need to have all 4th year students at clinic on 3rd year days except for maybe at the beginning of the rotation month. some 3rd year students relied too much on the 4th year students and need more experience in clinic without using 4th years as a crut
- None
- scheduling of patients
- Less babysitting
- more group members
- Only 2 or 3 seniors should be required to be in clinic on days when 3rd years see pts rather than the whole group
- None
- none
- need to schedule patient to available roompeople working
- none
- None
- more treatment rooms
- good rotation
- none
- 4th yeras should not have to be with the 3rd years all day
- scheduling
- a sink in each room would be nice
- less nails and calluses
- bigger groups
- more patients
- 4th years should have been off while 3rd years ran clinic
- not as many 4th years needed on MWF
- less 4th years in clinic at one time
- Schedule

- Schedule
- -
- none
- more variety of patients would be nicemore surgical patients
- nothing
- too many students at the clinic at one time
- none
- None
- none
- surgery
- lack of education. The rotation lacks academics. It relies on CPCs that cover material we already know since 2nd and 3rd years
- -
- none
- None
- More exposure to patients who arent there for nail care
- Less nail patients more interesting primary care patients.
- More complicated patients and treatment plans. More surgeries
- -
- Some treatment modalities are difficult to access such as CAM walkers and sterile gloves if the residents had access to this particular supply room things would move smoother.
- Nothing
- none
- It seems as though a few of the clinicians are there to collect a paycheck. Not teach.
- stop the babysitting of the 3rd years
- Running the clinic more efficiently i.e. time
- nothing
- Instruments
- less Pt
- more surgical opportunites
- More surgical cases need to be boarded so we dont get rusty on our surgical skills. Drug representatives need to show up when they are supposed to. More workshops with reps would be nice as well.
- seniors should not have to work saturdays
- Teachers need to be more attentive to students
- more surgery
- Nothing
- none
- Needs to teach students to be more realistic with noted writing
- more attention to wound care
- Greater 3rd year student independence
- 4th year students should have an extra extern month instead of watching over the 3rd years. The 3rd years are competent enough to handle clinic responsibilities.
- attitudes need adjusting
- more post op pts surgery pts
- TOO MANY TO NAME PLEASE START WITH WORKING ON PROFESSIONALISMGIVING STUDENTS RECOGNITION FOR THEIR WORK
- well done
- extra clinical learning
- None
- Intergrate the current technology x-ray machine with all cother computers including Huron
- none
- 4th years being in clinic
- charting training before starting the rotation
- more surgical opportunities for 4th years
- nail care
- more surgery
- a lot of down time esp on M W F
- none
- more activity in clinic
- more decision making responsibilities given to 4th year students. Let them diagnose and treat under the supervision of attending.
- NONE
- no need to be at this rotation when 3rd years are capable of taking care of the pts on MWF
- rotation schedules
- none
- BE MORE EFFICIENT

- BE MORE EFFICIENT
- Too much attention to note writing and not enough attention to patient care
- better timing for students
- fewer 4th years present on mwf
- no need for 4th years to be at neon
- schedule inefficient too many students for the need
- pts
- do not make 4th years come back. let them go to more programs where they can learn
- The timing of the rotation. Really kept us busy so we were seeing maybe 5 patients before getting a chance to type up the note for the 1st patient. Really hard to keep everyones history inline
- none
- needs more surgery pts
- none
- Do not go to neon
- need more attendings
- nothing
- Attending need to show-up ontime and be more energetic about seeing patients
- only need 1 4th yr when 3rd yrs are there
- none
- fewer students need to be in the rotation: some days there were 16 of us for 20 patients
- Cant write patient notes until attending opens the note which can take a long time if they are busy seeing other patients
- more patients
- The seniors should not have to be in a room at all times.
- The number of unnecessary seniors on some days
- No need for 4th years to be around at the end of the year because 3rd years rarely need 4th years at that point.
- More surgery experience
- more exciting patients
- none
- constructive criticism would led to less resentment possibly some donations from recent alumni
- see mostly nails
- Keeping the months testing fair among all 4th year groups.
- More on site teaching
- Surgical opportunities
- Too few patients for too many students
- so many that i cannot suggest right now
- none
- more exciting patients
- the attitudes of some residents and atendings
- Need to see more than nails
- evrthing but but nails there is more than enough to go around.. There is absolutely no diversity in the types of cases you see. Time would be better spent on a hospital externship studying or having a real vacation otherwise this rotation does nothing to
- more diversity in clinic
- need to have more patients to see
- 4th years babysit too much waste of time
- All CPCs should be done by Dr Caldwell
- no
- not really
- incorporate more surgery somehow
- Adherence to CPC scheules despite any weather
- Variety in pt pathologies
- Monday Wednesday and Fridays are a waste of time if youre a 4th year student
- School clinic
- none
- none
- Only 1 4th year should be present on MWF- the 3rd yrs are independent and that leaves the 4th years with not much to do.
- More time scrubbing into surgery cases diversity of care
- NO
- more surgery and enhance on patient population
- professionalism
- Amount of wound care seen
- Diversity in patients
- need patients

- need patients
- need more variety of patientd
- surgery better exploitation of time spent there more attending involvement with students and teaching opportunities
- less red tape
- none
- More variety in patient - currently majority nail care
- more diverse
- Wider variety of patients.
- o
- More diverse patient population
- needs to include OR time
- Too much gossiping by attendings in front of the students
- The rude secretaries Michelle and Stephanie need to stop treating students like they are the gum stuck on the bottom of their shoes....AND Michelle needs to stop picking and choosing what student doctors get a patient that has to receive diabetic nailcare
- maybe doing more CPCs would help
- see more patients
- more clinic experience other than onychomycosis
- more patients
- Need more types of pathology and less nail patients
- See more Canales pre- and post-ops
- more variety of pathology places to rotate
- Make sure all students see the same amount of patients.
- internal medicine reviews
- variety
- nothing
- everything
- Give 4th years another month for visiting programs instead.
- Need a larger patient base that does not just involve diabetic footcare. Need to see more surgery patients and pediatrics.
- Higher patient diversity. It is all nails patients
- the clinic needs to be more organized and run smoother there needs to be greater variety at the clinic
- more patietns
- none
- fewer students more patients surgery time
- patient load
- more patients
- More involvement of 4th years as teachers....that means too willingness of 2nd3rd years to learn!
- need to get patients in and out of clinic faster
- surgery
- more podiatric diversity
- all
- Need more patients and more diversity of patients
- more academics

03. Which best describes the location of this practice or hospital site:

- Rural Area - 2.1%
- Small Town - 2.6%
- Small City - 21.5%
- Suburb - 3.1%
- Large City - 0%
- No Answer - 70.7%

Additional Costs & Activities

04. Please type in your answers to the questions below about activities and necessary items. (Note: 500 character maximum per question)

a. If there was free time on weekends from this program, what did you find to do?
    - Hanging out with friends
    - party in cleveland
    - The same things you do every weekend
    - Hung at my crib ya

- Hung at my crib yo
