The Instructional Technology program at Kent State University offers an exciting opportunity for busy professionals to learn how to work with today’s instructional technologies. All of the programs listed on this flier can be taken entirely online.

**Master’s in Instructional Technology**
The Master's Degree in Instructional Technology (34 credits) is designed for those who wish to enhance the use of instructional technology in their classroom, to develop new online ways to deliver course materials to students, or to facilitate student projects that use information and communication technologies.

**Computer/Technology Endorsement**
The Computer/Technology Endorsement program includes both a Master’s Degree and an official state endorsement which is added to a teaching license (for 36 credits). Or the Endorsement-only program (26 credits) can be taken by those who already have a Masters Degree. The program provides credentials for those who wish to teach technology applications or who seek to be hired as technology coordinators in schools or districts.

**Instructional Technology Core Courses**
- Learning Theories
- Instructional Design
- Designing Visuals for Instruction
- Computer Applications in Education
- Instructional Applications of the Internet
- Current Issues in Instructional Technology

**Online Teaching & Learning Certificate**
This 15 credit hour certificate program will assist you in designing and teaching online courses. Focusing on the practical aspects of how to create and manage effective online learning environments, students work with course management systems, online discussion tools, wikis, blogs, and other Web 2.0 applications. Learn strategies for online assessment and group collaboration. The certificate can be obtained along with the general ITEC Master’s Degree.

**Online Teaching & Learning Certificate Courses**
- Distance Education
- Instructional Applications of the Internet
- Designing Online Courses
- Teaching Online Courses
- Research in Online Learning and Teaching

**Career Opportunities**
Some job descriptions facilitated by these programs are technology-competent teacher, computer teacher, online instructor, technology coordinator, media specialist, instructional designer, multimedia designer, Web developer, assessment/evaluation specialist, etc.
