Recent EPSY graduates are employed as...

Researchers

Teachers

University Instructors

Career Counselors

Small by Design >>>>>>>>>>

Source: Kent's IR Office

We engage and mentor students in learning the skills needed to improve learning, enhance educational practices, and guide policy.

Spring 2017 Enrollment

42 EPSY Graduate Students

Student Satisfaction

"The Educational Psychology program has been great for furthering my teaching career and professional development. I truly feel I have learned the skills necessary for helping me to become a better teacher. My professors have been extremely supportive, and I would highly recommend the program."

Amanda Stipanovich, MED Student

"Our mentors in the education department provided the students with a wide range of expertise, but also facilitated learning opportunities with faculty and student collaborators in other departments on campus. This cooperative spirit taught me many lessons that I apply in the educational and research settings that I work in today."

Dr. Patrick F. Cravalho, Ph.D. (2016)

Research Associate, Fatigue Countermeasures Group, NASA Ames Research Center
