

COGNOS

Inserting Page Breaks

You can create customized page breaks in Cognos that allow you to select the criteria. For example, in the Student Count by College and Major report, you may want a page break inserted for each new college. This document is a demonstration of Simple Page Breaks.

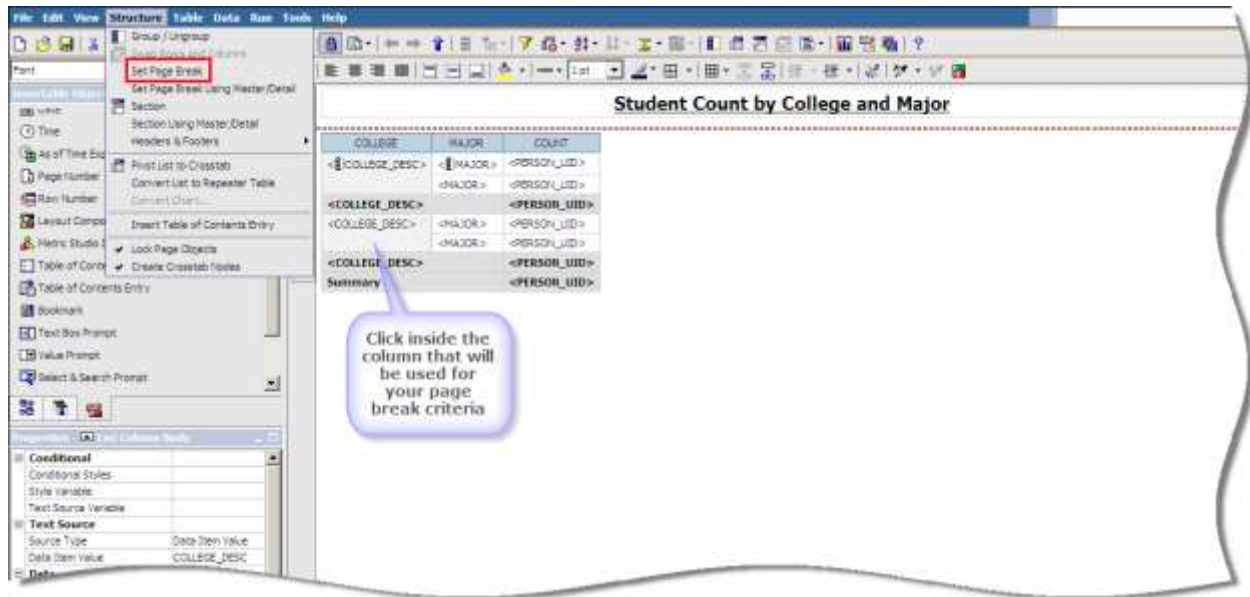

The default number of rows per page for HTML is 20; when viewing larger lists, you may want to increase

Simple Page Breaks

As you can see from the sample below, when you allow Cognos to use the default settings, you may not have all of the information on the same page.
