Test Scantron Survey

The existing Scantron (Bubblesheet grading) system is nearing end of life. The University Council on Technology (UCT) is discussing if the system needs to be replaced and if it is replaced what type of system would people prefer. This survey is being used to gather information to assist the UCT in it's deliberations.

Are you currently using the Scantron (Bubblesheet Grading) System?		
☐ Yes		
□ No		
Have you ever used the Scantron (Bubblesheet grading) System?		
☐ Yes		
□ No		
If the Scantron (Bubblesheet Gra	ding) system were no longer availa	ble you would
 Use Blackboard Learn utilizing R students to take the tests at home 	espondus lockdown browser for admin	ister tests allowing
 Use Blackboard Learn utilizing R proctored environment where the stu 	espondus lockdown browser to admini dents would take the test	ster tests but require a
 Use Blackboard Learn without Respondus lockdown browser for administer tests allowing students to take the tests at home 		
O Use Blackboard Learn without Respondus lockdown browser to administer tests but require a proctored environment where the students would take the test		
Choose a different form of testing rather than multiple choice		
O Use paper and pencil multiple choice test.		
Not have a good option for testing.		
10.0		
If the Scantron (Bubblesheet Grading) System were replaced you would prefer:		
The current centralized system (requires less knowledge to use)		
 A distributed system with forms created and scanned directly by instructors at local printers / scanners (required more knowledge to use) 		
Kent Email Address (Optional)		
Berger and the state of the sta
