

JUNE 8 - JULY 12, 2023 //

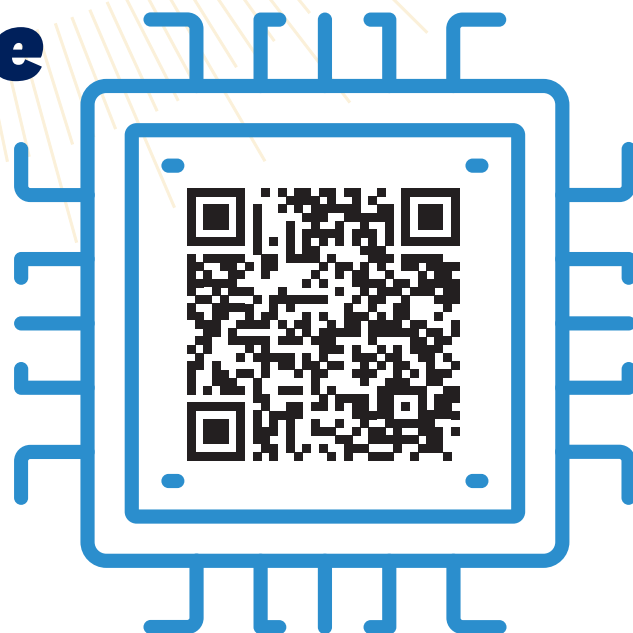

A Summer Institute designed for you

Are you a STEM-focused undergrad?

**This summer, start your journey to an exciting career
in the semiconductor and microelectronics industry!**

From computers and cellphones, cars, bank ATMs and more, semiconductors and other microelectronics are central to the operations of the items that fuel our everyday lives. Now, you can explore the field of semiconductor manufacturing and get credit toward your degree at the five-week **Ohio Semiconductor Education and Research Program (SERP) Summer Institute** at Kent State University by learning about the tools you'll need to successfully enter this fast-growing industry.

You'll have the option to live on Kent State University's beautiful campus while participating in this intensive, hands-on program and engage with fellow students from universities throughout Northeast Ohio.

SCAN TO GET STARTED!

**Register and learn more about important deadlines,
housing and financial aid by scanning the QR code
or visiting www.kent.edu/semiconductor-education.**
