

Department of Psychological Sciences' Faculty

Learn More About Faculty Advising & Request a Faculty Advisor Today: www.kent.edu/psychology/facultyadvising

Dr. Yossef Ben-Porath

Email: ybenpora@kent.edu

Area: Clinical Assessment

Research Interests:

- Clinical Assessment
- Assessment of psychopathology and personality
- Developing uses for MMPI instruments

Dr. Jeffrey Ciesla

Email: jciesla@kent.edu

Area: Adult Psychology; Child Clinical

Research Interests:

- Evaluating risk for depression and models of life stress
- Influence of rumination and maladaptive beliefs
- Application of SEM and HLM statistical techniques in psychopathology research models

Dr. Shannon Ciesla

Email: sciesla@kent.edu

Courses Commonly Taught:

- Adolescent Psychology
- Abnormal Psychology
- Introduction to Clinical Psychology
- Advanced Research Methods

Dr. Karin Coifman

Email: kcoifman@kent.edu

Area: Adult Psychopathology

Research Interests:

- Basic emotion processing
- Emotion regulation in relation to adjustment during acute and chronic stress
- Use of clinical interviews, experience sampling diaries and experimental/cognitive tasks

Dr. Douglas Delahanty

Email: ddelahan@kent.edu

Area: Health Psychology; Behavioral Neuroscience

Research Interests:

- Early biological predictors of psychopathology (PTSD) following traumatic events
- The impact of trauma history and PTSD on various disease samples (HIV+, surgical patients)
- Inform and conduct early intervention research to prevent/reduce the development of post-traumatic distress following trauma

Dr. John Dunlosky

Email: jdunlosk@kent.edu

Area: Cognitive Psychology

Research Interests:

- Metacognition
- Self-regulated learning
- Goal of research is to improve student learning and achievement

Dr. Christopher Flessner

Email: cflessne@kent.edu

Area: Child Clinical

Research Interests:

- Developing a better understanding of the biological and psychosocial risk factors linked to the development of anxiety in kids
- Development and course of obsessive-compulsive behaviors

Dr. Jocelyn Folk

Email: jfolk@kent.edu (Pre-med advisor for Psychology)

Area: Cognitive Psychology

Research Interests:

- Understanding the cognitive processes involved in reading and spelling
- Reading & spelling abilities in skilled & less-skilled populations
- Understanding how hearing impairment influences how people read

Dr. Stephen Fountain

Email: sfountain@kent.edu

Area: Behavioral Neuroscience

Research Interests:

- Psychological processes involved in the organization of behavior through time
- Effects of adolescent nicotine exposure on adult cognitive processes
- Brain structures and neurotransmitter systems involved in cognition

Dr. Judith Gere

Email: jgere@kent.edu

Area: Social Psychology

Research Interests:

- Subjective well-being, goal pursuit and romantic relationships
- How romantic partners pursue their goals (both joint & individual)
- Quantitative measurement and methodology

Dr. Lee Gilman

Email: tgilman@kent.edu

Area: Behavioral Neuroscience

Research Interests:

- Neurophysiology underlying behavioral responses to heterotypic stressors
- Influences of unhealthy diet on emotional and eating behaviors
- Contribution of dietary hormones to emotional and addictive behaviors

Dr. Josefina Grau

Email: jgrau@kent.edu

Area: Child and Adolescent Psychology

Research Interests:

- How parenting and family processes influence development in young children
- The role culture on parenting and child development in Latino families
- Factors that facilitate adolescent mothers' parenting and their toddler's development

Dr. John Gunstad

Email: jgunstad@kent.edu

Area: Clinical Assessment; Health Psychology

Research Interests:

- Effects of aging and disease on neurocognitive function
- Cardiovascular disease and obesity
- Non-pharmacological approaches to improving brain function

Dr. Mary Himmelstein

Email: mhimmels@kent.edu

Area: Social Psychology; Health Psychology

Research Interests:

- Intersecting social identities in the experience of stigma and discrimination
- Health consequences of weight stigma and how individuals cope with these experiences
- Men's health and masculinity: stress, healthcare delay, and help-seeking

Dr. Joel Hughes

Email: jhughes1@kent.edu

Area: Health Psychology

Research Interests:

- Clinical Health
- Cardiovascular behavioral medicine
- Role of psychosocial factors in patient self-management

Dr. William Lechner

Email: wlechner@kent.edu

Area: Adult Substance Use Disorders and Adult Psychopathology

Research Interests:

- Effects of neurocognitive deficits in addiction
- Bi-directional relationship between psychopathology and addiction; specifically, alcohol and nicotine use

Dr. William Merriman

Email: wmerrima@kent.edu

Area: Developmental Psychology

Research Interests:

- Children's language memory, and thought
- Emphasis on word learning and metacognition in early childhood
- Awareness of gaps in linguistic knowledge
- Overconfidence in memory

Dr. Angela Neal-Barnett

Email: aneal@kent.edu

Area: Child and Adolescent Psychology

Research Interests:

- Race, stress, and infant mortality
- Racial identity and "acting white" accusation
- Stress and anxiety management for middle school Black and Biracial girls

Dr. Katherine Rawson

Email: krawson1@kent.edu

Area: Cognitive Psychology

Research Interests:

- Optimizing learning in educationally relevant domains
- Strategies that promote the durability and efficiency of student learning
- How students monitor and control their own learning

Dr. Amy Sato

Email: asato2@kent.edu

Area: Child Psychology; Health Psychology

Research Interests:

- Obesity and weight management in children & adolescents
- The influence of stress & the role of family influences on healthy weight management
- This lab collaborates with the pediatric weight management program at Akron Children's Hospital to conduct research

Dr. Sharon Sciartelli

Email: ssciarte@kent.edu

Courses Commonly Taught:

- General Psychology
- Social Psychology
- Abnormal Psychology
- Psychological Assessment

Dr. Mary Beth Spitznagel

Email: mspitzna@kent.edu

Area: Health Psychology; Clinical Assessment; Neuropsychology

Research Interests:

- Clinical neuropsychology
- Cognitive impact of obesity, diet, and exercise
- Caregiver burden

Dr. Jennifer Taber

Email: jtaber1@kent.edu

Area: Social Psychology; Health Psychology

Research Interests:

- Understanding and promoting health behaviors, such as reducing sun exposure or eating a healthy diet
- Understanding how people think about genetic risk information for disease
- Understanding when and why risk perceptions predict behavior

Dr. Clarissa Thompson

Email: cthomp77@kent.edu

Area: Developmental Psychology; Cognitive Psychology

Research Interests:

- How children learn, develop strategies and remember information
- Shifts in children's numerical representations with increasing age and experience
- How children draw analogies between numerical contexts to help them solve problems

Dr. John Updegraff

Email: jupdegr1@kent.edu

Area: Social Psychology; Health Psychology

Research Interests:

- Understanding health
- Health communication
- The role of message framing and message tailoring in promoting health behavior change

Dr. Christopher Was

Email: cwas@kent.edu

Area: Cognitive Psychology

Research Interests:

- Testing different models and aspects of working memory to determine how processing limits in working memory affect complex cognitive processes such as comprehension
- Student self-regulated learning

Dr. Maria Zaragoza

Email: mzaragoz@kent.edu

Area: Cognitive Psychology

Research Interests:

- Eyewitness Memory and Suggestibility
- False Memories and False Beliefs
- Correcting Misinformation in News Reports
