

WHICH PSYCHOLOGY MAJOR/CONCENTRATION SHOULD I CHOOSE?

Bachelor of Arts in Psychology or Bachelor of Science in Psychology

BACHELOR OF ARTS (BA) IN PSYCHOLOGY

A flexible degree that allows students to more easily add a minor or even double-major.

OPTION 1: NO CONCENTRATION

This option is for students wanting to keep their career and/or graduate school options open after graduation or to tailor the major to their specific interests.

OPTION 2: CHILD PSYCHOLOGY

This concentration is for students wanting to work with children/adolescents and/or attend a graduate school program with a focus on children/adolescents.

OPTION 3: COUNSELING CAREERS

This concentration is for students wanting to work in a counseling-related field and/or attend a counseling-related graduate program.

GPA requirement for BA: minimum 2.000 major GPA

BACHELOR OF SCIENCE (BS) IN PSYCHOLOGY

Designed for students interested in careers in research or medicine. Requires specific courses in advanced math and the natural sciences.

OPTION 1: NO CONCENTRATION

This option is for students wanting to pursue a research-oriented graduate school program or career, using electives to create their own focus area.

OPTION 2: CHILD PSYCHOLOGY

This concentration is for students wanting to pursue a research-orientated graduate school program or career with a focus on children/adolescents

OPTION 3: PRE-MEDICINE/PRE-PODIATRY

This concentration is for students who want to attend medical school or a related health program.

GPA requirement for BS: minimum 2.500 major GPA
