Ashtabula Agricultural Research Station

Seeking Student Assistant-Vineyard Worker

Ashtabula Agricultural Research Station sits on a 25-acre site in Kingsville, Ohio, and is one of eight outlying research stations operated by The Ohio State University’s Ohio Agricultural Research and Development Center, the research arm of the College of Food, Agricultural, and Environmental Sciences. Our role is assisting OSU faculty and staff in their efforts to expand the knowledge of grape varieties and vineyard practices with trials in viticulture, entomology and disease control, as well as to serve the needs of the grape and wine industry along northeast Ohio’s lakeshore.

Vineyard workers will assist research staff with field operations to establish, maintain and harvest crop research plots. Operations may include planting and harvesting of research crops, collecting soil and plant samples, recording data, data entry and record keeping, computer data entry; weighing and grading produce; pruning, weeding, maintenance irrigation. The successful applicant may operate agricultural machinery including mowers and grounds equipment; clean and maintain work areas and other duties as assigned.

While some prior experience is desirable, employees will receive training in all required operations. To learn more about this opportunity, please contact the Ashtabula Agricultural Research Station at 440-224-0273 or email kirk.197@osu.edu. Visit us on Facebook, search OARDC Ashtabula Agricultural Research Station.
