SECTION I: GENERAL INFORMATION
SECTION I: GENERAL INFORMATION

What is a High Quality Professional Educator?-----------------------------------------------

The conceptual framework for the teacher education unit at Kent State University is based upon the University Mission that we prepare students for responsible citizenship and productive careers, broaden intellectual perspectives, and foster ethical and humanitarian values.

In-Depth Content Knowledge
• Knows and understands discipline-specific content and pedagogy
• Places knowledge in a broader context and integrates it with other content areas
• Seeks out and uses innovative, content-appropriate teaching methods

Learner-Centered Pedagogy
• Understands how students learn
• Facilitates inquiry-based learning and authentic assessment
• Creates a learning environment that helps students build on prior knowledge
• Uses technology in an ethical, critical, and competent manner as a means to acquire, provide, organize, and communicate knowledge

Informed Reflective Practice
• Draws on research, theory, and multiple fields of knowledge for the development of curriculum, pedagogy, and educational programs
• Employs the iterative process of action, observation, and reflection as the basis of improving practice
• Uses multiple sources of data to plan, revise, and enact curriculum and educational programs

Ethical and Culturally-Responsive Practices
• Exemplifies the highest ethical standards of the teaching profession
• Values richness of human differences
• Adapts assessment, pedagogy, and educational programs to individual differences
• Understands the role of public education in a democracy
• Advocates for students and families

Professional Collaboration
• Understands the role of other professional educators
• Demonstrates leadership for educating all children in collaboration with educators, agencies, families and communities
• Values and demonstrates commitment to ongoing professional development

During capstone student teaching experiences, student teachers are assessed in areas related to the above values and behaviors, specifically in the standards of teaching related to content knowledge, implementation of strategies to ensure teaching for learning, establishing effective learning environments, and commitment to professional practice. These standards are themselves connected to the strategic directions of Kent State University seeking to:

a) create innovations in learning,
b) engage the world,
c) focus on those we serve and
d) build and sustain partnerships.
Roles and Responsibilities

Statement of Philosophy

The clinical experience should represent a pivotal point in students’ preparations to becoming teachers. It is the time when theory and practice meet and when student teachers discover whether they can or even want to teach. Traditional field experience supervision models are comprised of a triad consisting of the student teacher, cooperating teacher, and university supervisor (see below). Each make contributions categorized by specific features relevant to the field experience such as focus, priorities, special expertise, scope, professional concerns, and qualifications. In terms of focus, the university supervisor is primarily concerned with student teachers and how they are fulfilling the college program’s expectations. The cooperating teacher’s focus is on how the student teachers are functioning in the classroom. However, the emerging trend is a movement toward mutual responsibility, including faculty and administrators from the teacher education unit and members from the local school (Burret & Slick, 1995). Accordingly, an additional area of focus should come from the building principal who would be concerned with how the student teachers become knowledgeable and function within the larger context of teaching from a school, community, and global perspective.

A new model of collaboration in teacher preparation that includes the building principal is provided in the following chart listing specific roles and responsibilities of the student teacher, the cooperating teacher, and university supervisor.

<table>
<thead>
<tr>
<th>Student Teacher</th>
<th>University Supervisor</th>
<th>Cooperating Teacher</th>
<th>Principal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building knowledge of students and teaching, constructing personal identity as a teacher, and developing standard procedural routines for class management and effective instruction.</td>
<td>Ensuring teacher preparation program philosophy is met while creating balance and support for the student teacher, cooperating teacher, and building principal.</td>
<td>Supporting authentic practices through a variety of rich opportunities for the student teacher to build a context for understanding and facilitating the complex relationship between teaching and learning.</td>
<td>Providing the connection between teacher preparation coursework and the educational context that includes how classroom practices interact with district/school mission and goals, the conditions and dynamics of a diverse community, and the global issues and forces affecting teaching and learning.</td>
</tr>
</tbody>
</table>

(Varrati, LaVine, & Turner, 2007)

Student Teaching Triad

The relationship between the university supervisor, the cooperating teacher, and the student teacher is an important one. Therefore, it is expected that communication occurs frequently as a team. The student teacher should be informed of his/her progress (strengths as well as weaknesses) on a regular basis. All evaluation forms should be discussed with the student teacher during conferences.

Because the university supervisor and the cooperating teacher view the student teaching experience from unique and different perspectives, each perspective should be thoroughly represented. Therefore, the university supervisor and the cooperating teacher will independently complete a paper copy of the unofficial Student Teaching Assessment at midterm and end of the placement and present to the student teacher during a
conference. The supervisor will then enter both assessments online. Once the form is completed, an automatic email will be sent to the student teacher containing a link with the completed assessment for electronic signature. Once signed by the student teacher, the assessment is official and can be downloaded for printing.

**Teacher Performance Assessment (edTPA)** Go to www.edtpa.com for more details. All student teachers will also complete the Teacher Performance Assessment by the deadline set by the Teacher Education Coordinator or your program (whichever is earlier). The general deadline will be the Friday of the 10th week of the semester. However, please check with your program if they require it to be submitted earlier. The Teacher Performance Assessment (edTPA) is a subject area specific, performance-based assessment for pre-service teacher candidates, focused on student learning. Developed at Stanford University and administered by Pearson, this portfolio process will evaluate a teacher candidate’s ability to create and assess an effective lesson sequence, teach all students, and reflect on the teaching process. Each teacher candidate will develop a portfolio of artifacts, including lesson plans, video clips of instruction, student work samples, teacher assignments, analyses of student learning and reflective commentaries. Specifics necessary for each portfolio are clearly designated in edTPA handbooks. Materials, including all handbooks and templates for each portion, guides on making good choices and others items to support your completion of your edTPA portfolio, will be available online for all student teachers via Blackboard (see the edTPA Student Teaching page) and all can also access materials via the student site of www.edtpa.com. In the early weeks of the student teaching semester, the teacher candidate will distribute a letter to inform students and parents of the edTPA process, including the video clips necessary for the portfolio (see the sample Permission Letter on page 59). A consent form will be collected by the teacher candidate to obtain parent/student permission to participate in the edTPA process (see sample Permission Form on page 60). The final deadline for all program submission in the end of the 10th week, however, if a program has an earlier due date specified by the Inquiry Seminar instructor, the earlier date is the due date for that program.

Beginning in the Fall 2016, all edTPA portfolios were sent for national scoring. To pay for this and other supports for the process, a fee of $100 is assessed for undergraduates to your student account each semester during your junior and senior years, with the maximum charge capped at $400. Graduate students are assessed the fee beginning in the first term until the cap is met.

Completion of the edTPA is one of the requirements for passing student teaching. **There is no ‘cut score’ for passing in general, the only requirement is completion. The College of EHHS defines ‘completion’ as submission with no condition/error codes, with the opportunity to remediate. However, some programs may use scores in course grading, so students should check their inquiry syllabus to be sure.**
Student Teaching (Clinical Experience)

Placement Process

The Vacca Office of Student Services (304 White Hall) will request an appropriate student teaching placement during the semester prior to the student teaching experience. The following two conditions must be met before a placement will be requested:

1. Student teacher candidates must maintain eligibility according to College policy, including all coursework, GPA, dispositional standards, student teaching prerequisite trainings such as Child Safety, CPR and ALICE, and any other criteria as specified by their Program Area Faculty and/or College.

2. Student Teacher candidates are required to enter the ‘student portal’ to complete an on-line application, using the Clinical Experience link, prior to participating in their Student Teaching semester. Students are assigned to a designated ‘application period’ to complete their forms based on their program major. Information on program timelines is available each semester on the Clinical Experience website.

Placements are generally made within a 50 mile radius of the Kent Campus and/or your residence. Requests for specific placements within our contracted districts are taken into consideration, however; there is no guarantee that a request can be met. Student teachers are responsible for having reliable transportation, and for any and all travel arrangements to and from their placement site.

The Vacca Office of Student Services adheres to the following guidelines for placements:

1. Our accrediting agency, the National Council for Accreditation of Teacher Education (NCATE), will be transitioning to the Council for the Accreditation of Educator Preparation (CAEP) which requires that “student teachers develop and demonstrate proficiencies that support learning by all students as shown in their work with students with exceptionalities and those from diverse ethnic, racial, gender, and socioeconomic groups.”

   In accordance with the College’s Conceptual Framework which values diversity and global awareness in teacher preparation, student teachers are required to participate in field experiences and clinical practice within the partnership districts that include students with exceptionalities and students from diverse backgrounds, including but not limited to ethnic, racial, gender, linguistic, and socioeconomic diversity.

   Experiences with diversity are linked to course-related field experiences. If a student teacher has not experienced diversity in prior field experiences, then the Vacca Office of Student Services will attempt to locate a school/district that fulfills this requirement.

2. Placements will be requested in our 200+ partnership schools and districts in NE Ohio. Additional opportunities for student teaching can be arranged in our current established programs in Florida, Arizona, and Texas. Applications for out-of-state placements (non-SPED) should be submitted by October 1st for Spring semester, and March 1st for Fall semester. Students interested in overseas opportunities should contact the office of
Consortium for Overseas Student Teaching (COST). Student Teachers for SPED programs will apply for out-of-state through their program faculty. **ALL confirmed placements must be officially approved by a designated school district administrator.**

3. A student teacher is not permitted to student teach in the same school district where he/she is employed, where relatives are employed, where their children are attending, or from which he/she has graduated unless graduation was more than 10 years ago.

4. University policy 3342-3-18 requires that students with disabilities be provided reasonable accommodations to ensure their equal access to course content. If a student teacher is registered with Student Accessibility Services (SAS) and requires special accommodations, he/she must inform the Vacca Office of Student Services at the time of application for student teaching so that an appropriate placement can be secured.

5. The Vacca Office of Student Services must make all arrangements for student teaching. Arrangements made any other way will not be recognized as valid. **Under no circumstances will a prospective student teacher contact any school district personnel with the intention of securing his/her own placement.** The Clinical Experience Placement office reserves the right to change a student’s placement site if it is deemed to be inappropriate, insufficient, or contrary to the expectations, policies and practices of our teacher preparation programs.

Student teachers will be notified by KSU email about the details of their placement. As soon as the confirmation notice is received, student teachers should contact the cooperating teacher to make arrangements for schedule and curriculum materials and reply to the Student Teaching Placement Specialist that the placement information was received.

**Background Checks**

Student teachers are required to complete Bureau of Criminal Investigation and Identification (BCII) and Federal Bureau of Investigation (FBI) background checks and submit the results to authorized personnel at their assigned “school/agency” on or before the first day of the semester in which student teaching/internship will take place.

BCII and FBI background checks can be completed in the Instructional Resource Center (IRC), Room 221 White Hall, during operating hours. Contact the IRC to verify dates and hours of operation at 330-672-2353.

**BCII.** The BCII check requires current, state issued identification (driver’s license or a state identification card issued by the Bureau of Motor Vehicles). The cost is $25.00 and can be paid with cash or check (payable to IRC@KSU). Student teachers are responsible for the payment of this fee at time of service.

**FBI Fingerprinting (Federal).** Electronic fingerprinting can be done in the Instructional Resource Center (IRC), Room 221 White Hall, during operating hours. The cost is $30.00 and can be paid with cash or check (payable to IRC@KSU). Student teachers must bring current state issued identification (driver’s license or identification card). Student teachers are responsible for the payment of this fee at the time of service.
Both of these background checks must be mailed to the student teacher. DO NOT SEND THE RESULTS OF BACKGROUND CHECKS TO KENT STATE UNIVERSITY OR THE STUDENT TEACHING SITE.

Both of these background checks are required when applying for initial licensure as well. Student teachers may be able to use these same background checks when applying for licensure. Both background checks expire after one year (valid 12 months/365 days from the date of issue). Request a copy be sent to the Ohio Department of Education if this check will be within one year of applying for licensure.

Neither the Vacca Office of Student Services nor your faculty views these results. For any questions, student teachers can review the Standards for Licensure and Employment of Individuals with Criminal Conviction concerning the results of background checks. This document can be viewed on the Ohio Department of Education website at education.ohio.gov Locate “Teachers” in the topic menus bar at the top of the homepage, from there go to “Educator Conduct,” and then “Effects of Convictions on Licensure.” For additional help, contact the ODE Office of Professional Conduct. Their phone number is 614-466-5638.

For further questions regarding the directions, please contact the Clinical Experience Office in the Vacca Office of Student Services at 330-672-2870.

**Alcohol and Drug Abuse.** Any indication of drug and/or alcohol use will result in removal from the school. Strong indications of cigarette, cigar or pipe use, cologne, after shave or perfumes may be offensive to colleagues and students in schools.

**Attendance/Time Commitment.** It is expected that a student teacher will follow the cooperating teacher’s scheduled work day and be actively engaged during the required number of weeks as determined by the program area and the published schedule by the Vacca Office of Student Services. Professional obligations may require the student teacher to work beyond the scheduled work day.

Student teaching is a full-time professional commitment. Other commitments and obligations should be reduced to a minimum during this time. Student teaching duties must be given first priority. The student teacher is required to follow the calendar of the school where assigned (i.e., spring vacation and other days off are not necessarily the same as the University’s calendar). Inquiry/Seminar classes follow the university calendar for both scheduled and unscheduled breaks (e.g. snow day) in the school calendar.

In case of illness and/or emergency, the student teacher must contact the cooperating teacher immediately, and the university supervisor must be notified, whether an observation is planned or not. Lesson plans must be available for the cooperating teacher even on the days of absences. Any illness, in excess of three consecutive days, must be documented by a written excuse from a doctor.

In addition, for any absence, the student teacher must complete an Absentee Form provided by their university supervisor (see sample in “Forms Section”) stating the reason for the absence. The form must be signed by the cooperating teacher, the student teacher, and the university supervisor. The university supervisor will return this form to the Vacca Office of Student Services, 304 White Hall, at the end of the semester.
Absences will affect the continuity of the student teaching experience and could result in an extension of the experience or unsatisfactory rating of student teaching. All decisions on grading, in these circumstances, will be at the discretion of the Vacca Office of Student Services in consultation with the program coordinator and/or program area faculty.

**Calamity Days/Inclement Weather.** While student teaching, if school is closed due to inclement weather conditions, natural disasters, power outages, structural damages, or other emergency, student teachers are not required to make up the time unless it affects spring break or winter break, OR if it effects the completion of the minimum number of required days engaged with students, per the Ohio Department of Higher Education. If the school cancels its spring/winter break and teachers must report that week, then the student teacher will need to report to the site also.

Student teachers are not to call the school to ask if school is in session. All of the school districts will report their closing over radio and television stations (or on their websites) and student teachers are expected to locate school closing information at the appropriate station. Additionally, it is important that a phone call list be established with the teacher(s) and the university supervisor in the event that student teachers are not to report to schools.

Because of contractual obligations or other special conditions, cooperating teachers (of the participating schools) may be required to report to school even though their students do not. If this situation exists, student teachers also will report since they are required to follow the cooperating teachers’ schedules.

**Conflicts Between School Districts and Their Teachers/Staff.** Because student teachers in the state of Ohio (1) do not have the legal status of certificated or licensed personnel (2) they are not substitutes for personnel (3) are not district employees (4) are not members of the bargaining unit, and (5) because their proper role is that of “learner”, the student teacher should not report for duty or be in or near the building of assignment in the event of a labor union strike or work stoppages. Should any of these events occur, the student teacher is to immediately telephone their university supervisor.

In the event that the school to which the student teacher is assigned is subject to a jurisdictional dispute between a teacher's association and the school district, student teachers will assume a position of neutrality. The student teacher is to remain away from the placement site and not participate in either side of the dispute.

**Corporal Punishment.** Student teachers in the state of Ohio do not have the legal status of certificated personnel. A student teacher is NEVER to administer corporal punishment as a means of discipline.

**Documentation.** If student teachers need to document students’ work (i.e., photographs, videotapes, audiotapes, etc.), the sample form in the “Forms Section” (Permission for Photographs/Videotapes/Audiotapes of Children) or the form that the district provides should be used. The Teacher Performance Assessment (TPA) requires a special form be used. When reviewing student records and/or IEPs, student teachers must adhere to professional ethics on confidentiality.

**Health-Related Issues.** Issues relating to the health of student teachers and/or students in classrooms will be handled on an individual basis.
**Liability Insurance.** The university provides liability insurance coverage for all KSU students, and this coverage extends to student teachers in northeast Ohio and within the 50 states. Student teachers for the COST (Consortium for Overseas Student Teaching) program must secure separate professional liability insurance in order to be considered for that program because they are not covered overseas under the university’s policy. Additional coverage can be obtained through student education associations such as KSEA (Kent Student Education Association) or ASEA (Art Student Education Association). Liability coverage begins prior to the official start date of the semester through the last day of classes ONLY if student is registered for the Student Teaching course.

**Medications.** Student teachers are NOT permitted to administer medications to students.

**Obligations Beyond Student Teaching.** Outside obligations such as jobs, family obligations or coursework cannot be used as an excuse for marginal or unsatisfactory performance during the student teaching experience. Student teachers are not permitted to take other coursework during student teaching (except for Inquiry into Professional Practice) unless they have special permission from a faculty advisor. A “Request for Exception to Eligibility for Student Teaching” form can be picked up in 304 White Hall.

**Professional Commitment by Student Teacher Candidates**
In order to meet the very high standards expected of our student teachers by both the College of Education, Health and Human Services and the Council for the Accreditation of Educator Preparation, the student teaching experience should be considered as a ‘full time job’ that requires the full commitment and professional dedication of our students. Additionally, the OBR/ODHE interpretation of OAC 3301-24-03 (C)(8) is that students should not expect to be employed, nor compensated, by any other agency or institution during the scheduled hours of their placement. Opportunities for employment outside of the regularly scheduled school day (i.e. Coach or Advisor) may be permitted.

**Professional Conduct and Appearance.** The teaching profession requires that its members possess high standards of personal conduct, a neat personal appearance, and good personal hygiene. Student teachers should follow the standards of professional conduct and the personal appearance standards as specified by the placement site’s teacher handbook or by the administrator in charge.

The school staff handbook often address length and style of hair, beards and moustaches, piercings, style of dress, tattoos and length of skirts. If student teachers feel the standards asked of them are unreasonable and are unable to conform to these standards, please consult with your university supervisor or the Director of Student Teaching before taking issue with the administrators in the assigned building. Program areas may also have specific guidelines to follow. Be advised that items posted on the Internet, including social networking sites, even when removed by the person who posted it, may be able to be accessed by employers, students, and parents now or in the future.

**School Policies.** School policies may vary from school to school. Upon arriving at the school assignment, the student teacher should immediately become familiar with school policies (zero tolerance, suspected child abuse or neglect, incident reporting, universal health precautions, cell phones, text messaging, social networking, etc.), regulations and physical facilities of that school. The cooperating teacher or building administrator should help student teachers with this orientation to the school. Some districts may require TB tests or passage of the Ohio Educator Assessment (OAE) content area test prior to the beginning of the student teaching experience.
**Student Teachers as Subs, Aides, Tutors.** Student teachers are not permitted to be regularly employed or compensated as Aides, Tutors or Subs. Consideration for “subbing” may occur if they have met the following criteria:

- Successful completion of the student teaching semester and a *Letter of Early Completion* from the Vacca Office of Student Services (304 White Hall). This letter will be issued at a student teacher’s request, after grades are posted, AND the student has completed the licensure pre-application process, and satisfied all other requirements as outlined in the procedures found in the Student Portal [https://stuportal.ehhs.kent.edu](https://stuportal.ehhs.kent.edu).
- Eligible to receive a Resident Educator teaching license from the State of Ohio.

Situations may arise in which the cooperating teacher to whom a student teacher is assigned may become ill or have an emergency for a portion of the day. In a situation of this type, it is reasonable for the principal to ask the student teacher to assume direction of the class for a portion of the day if he/she judges that the student teacher is capable of carrying out this responsibility. Under these circumstances, either the principal or another certified staff member must assume the supervisory responsibility and/or periodically check with the student teacher during that day. If a student teacher is requested to substitute teach beyond a partial day, then he/she must decline. If there is any question about this policy, the principal should call the Vacca Office of Student Services (330-672-2870) for clarification.

**Assessment of Student Teachers**

**Performance Assessment**

The student teaching experience is the culmination of a systematic curriculum in teacher education. It provides an essential opportunity for the student teacher to demonstrate (in an actual school setting) over a period of weeks that the knowledge, skills, and disposition for teaching have been acquired to perform as an entry-year teacher. It also provides an opportunity for school and university educators to review the outcomes of the teacher education programs.

Assessment is a continual part of the total student teaching experience and is a cooperative process shared by the student teacher, the cooperating teacher, and the university supervisor. The philosophy of the education faculty at Kent State University is that the student teaching experience should be structured to facilitate success, and that every effort should be made to provide each student teacher with the support needed to perform to the best of his or her ability. The university supervisor will leave a written observation report after each visit. The cooperating teacher and the university supervisor will complete a midterm and final evaluation during the student teaching placement as well as a disposition assessment at the midterm or as needed during the semester. These will include a conference involving the student teacher, the cooperating teacher, and the university supervisor and copies of the final assessments will be made available to the student teacher.

**Rationale for the Student Teaching Assessment Instruments**

The Vacca Office of Student Services aligns its assessment instruments and procedures with the Ohio Standards for the Teaching Profession (OSTP) and the Teacher Performance Assessment (edTPA). The systematic change in teacher education has gone from areas of
study and requirements to an outcomes-based model, which focuses on what the beginning
teacher should know and be able to do.

The assessment instruments are aligned with the Ohio Standard for the Teaching Profession
published by the Ohio Department of Education (ODE) and the Teacher Performance
Assessment. In addition, each program area may use supplemental assessments representing
standards from that SPA (Specialized Professional Association). The following information will
provide guidance for implementing these assessment instruments.

**Observation**
The basis for virtually every aspect of the supervisory process is observation of the student
teacher. Success in student teaching to a large extent depends upon the effectiveness and
frequency with which the cooperating teacher responds to the continuing concerns, "How am I
doing?" "How can I improve?" "How does this impact learning in the classroom?" This is part of reflective practice.

The cooperating teacher should be present most of the time throughout the student teacher
experience. The cooperating teacher will devote less time to formal observation as the student
progresses into the mid-stage of student teaching but will continue to maintain a high level of
awareness. In the final stage, formal observation should occur often to provide the student
teacher with systematically collected feedback.

Any time the cooperating teacher is observing formally, he or she should be prepared to take
notes. These notes provide a continuous record of the teaching student teacher’s performance,
areas of strength and areas that may need improvement. The student teacher should be
encouraged to review the notes periodically as a means of self-appraisal. Observations and
feedback from the cooperating teacher are crucial to the student teaching experience.

If the cooperating teacher should at some point develop reservations regarding the student
teacher’s performance, the cooperating teacher’s own copy of these notes provides
documentation to support that assessment. The notes are especially useful as a source of
information if it subsequently becomes necessary to prescribe clinical work on campus for the
student teacher to develop or improve in areas in which he or she is deficient. The school
principal should be invited to observe the student teacher and give additional feedback.

**Midterm Assessment**
Each student teacher must be assessed during a midterm conference using the Student
Teaching Assessment form. While daily notes and conferences give the student teacher an
indication of specific aspects of his or her teaching, the midterm assessment provides a
comprehensive view. The student teacher should be informed of both strengths and
weaknesses through the student teaching experience. The university supervisor will provide an
unofficial Student Teaching Assessment form to the cooperating teacher during the orientation
meeting at the beginning of the student teaching experience.

A structured midterm evaluation is conducted jointly by the cooperating teacher, the student
teacher, and the university supervisor. The paper copy of the unofficial midterm assessment
form is prepared independently by the university supervisor and cooperating teacher and discussed with the student teacher during the midterm assessment meeting. Any item rated as "below the acceptable level" requires a written comment by the assessor in the box provided AND may require a Student Teacher Professional Development Contract (the terms of which must be met within the timeframe as designated).

No later than one week after the meeting, the university supervisor will enter her/his assessment and the cooperating teacher’s assessment in an online form that can be found at https://fsportal.ehhs.kent.edu/index.php After logging in with the Flashline user id and password (for assistance contact the University help desk at 330.672.HELP), click on “Unit Assessment” and “Disposition Assessment.” Then select the student teacher’s name and complete the form. Once the form is completed, an automatic e-mail will be sent to the student teacher containing a link with the completed assessment for electronic signature. Once signed by the student teacher, the assessment is official and can be downloaded for printing. The deadline for submitting the midterm online assessments is Friday of the 7th week of the university semester.

**Summative Assessment & Final Grade**

Toward the end of the student teaching experience, the student teacher’s performance is rated independently by the university supervisor and the cooperating teacher on a paper copy of the unofficial final summative form. The final summative assessments are shared with the student teacher at a final conference. In order to receive a “Satisfactory/Passing” grade for Student Teaching, a Student Teacher must: (1) successfully complete 17 of the final assessment items as "Met", with no items marked as "Not Met" (2) earned a passing score on any ‘program area’ student teaching assessments, and (3) satisfactorily completed any PDPs assigned for “Needs Improvement” on the Disposition Assessment. Student Teaching “Seminar/Inquiry” courses are graded ‘A-F’. Attendance is required at all Seminar sessions. Contact your department for further information about course requirements, grading, and schedule.

No later than one week after the meeting, the university supervisor will enter her/his assessment and the cooperating teacher’s assessment in an online form that can be found at https://fsportal.ehhs.kent.edu/index.php. Once the form is completed, an automatic email will be sent to the student teacher containing a link with the completed assessment for electronic signature. Once signed by the student teacher, the assessment is official and can be downloaded for printing. The deadline for submitting the summative online assessment is Friday of the 15th week of the university semester.

**Special Note:** University policy stipulates that the last day of the 10th week of the university semester is the last date a student can WITHDRAW from a class. After that date, students will receive a “U” in student teaching.

**Additional Assessments**

1. **Disposition Assessment**
A major part of our teacher education program at Kent State University is the development of dispositions related to caring, fairness, honesty, responsibility, commitment, and social justice. Student teachers are expected to consistently demonstrate all of the behaviors and qualities indicative of professionalism, work ethic, and personal qualities in order to receive a grade of “Satisfactory” for student teaching.

A Disposition Assessment (see sample in “Forms Section”) for each student teacher will be completed online by the university supervisor in consultation with the cooperating teacher during the midterm time. During a conference with the student teacher, an unofficial paper copy may be used, but the assessment is not official until it is signed electronically by the university supervisor and the student teacher. The assessment can be found at. [https://fsportal.ehhs.kent.edu/index.php](https://fsportal.ehhs.kent.edu/index.php) After logging in with the Flashline username and password, click on “Unit Assessment” and “Disposition Assessment.” Then select the student teacher’s name and complete the assessment.

After the assessment is electronically submitted by the university supervisor, the student teacher will receive an automated email indicating that the completed Disposition Assessment is available at [https://fsportal.ehhs.kent.edu/index.php](https://fsportal.ehhs.kent.edu/index.php) and that an electronic signature is required by the student teacher. The email will also indicate if a “needs improvement” has been submitted. If a needs improvement has been submitted, the student teacher will be told to complete a Professional Disposition Plan (PDP) located on the “student portal”; students should confer with their Supervisor on the criteria and content of the PDP. It is also on the faculty/staff portal but the student teacher needs to initiate it. The student teacher needs to meet with the university supervisor and cooperating teacher to discuss the PDP and both student teacher and supervisor need to sign-off electronically. Student teachers are advised that a needs improvement MUST be remedied by the end of student teaching.

The deadline for the submission of the online Disposition Assessment by the university supervisor is Friday of the 7th week of the university semester. The Disposition Assessment may be submitted earlier if warranted. The student MUST have ample time to submit a Professional Disposition Plan (PDP) and enact it. Students with outstanding dispositions are not cleared for graduation.

Student teachers are evaluated in previous courses, and progress is reviewed by program coordinators with the intent of assisting student teachers select an alternative major prior to student teaching if unsatisfactory dispositions are not satisfactorily addressed.

2. **Supplemental Assessments for Specific Program Areas**
   
   Supplemental Assessments representing program areas’ SPAs (Specialized Professional Associations) may be completed for specific program areas. These are provided by program coordinators.

3. **The Teacher Performance Assessment (edTPA)**
   
   The Teacher Performance Assessment (edTPA) is a subject area-specific, performance-based assessment for pre-service teacher candidates, focused on student learning. Developed at Stanford University, this portfolio process will evaluate a teacher candidate’s ability to create
and assess an effective lesson sequence, teach all students, and reflect on the teaching process. Each teacher candidate will develop a portfolio of artifacts, including lesson plans, video clips of instruction, student work samples, teacher assignments, analyses of student learning and reflective commentaries. Specifics necessary for each portfolio are clearly designated in edTPA handbooks. Materials, including all handbooks and templates for each portion, guides on making good choices and others items to support your completion of your edTPA portfolio, will be available online for all student teachers via Blackboard (see the edTPA Student Teaching page) and all can also access materials via the student site of www.edtpa.com. In the early weeks of the student teaching semester, the teacher candidate will distribute a letter to inform students and parents of the edTPA process, including the video clips necessary for the portfolio (see the sample Permission Letter on page 59). A consent form will be collected by the teacher candidate to obtain parent/student permission to participate in the edTPA process (see sample Permission Form on page 60). The edTPA is due to be uploaded no later than the Friday of the 10th week of the semester, but a program or the inquiry course may designate an earlier due date. Completion of the edTPA is one of the requirements for passing student teaching. Completion is defined as submission with no condition/error codes, with the opportunity to remediate.

Conflict Resolution & Student Teacher Conduct -----------------------------

A partnership is the ideal relationship in the student teaching experience. However, student due process procedures are established for the student teacher who is involved in a discrepancy at their placements site, or does not agree with the evaluation of his/her performance during any time of the student teaching semester.

The following appeal procedure is established. The first step is to contact the person with whom you have a disagreement to discuss the nature of the disagreement. If a resolution is not achieved, the second step is to contact the university supervisor to explain the nature of the disagreement. If a resolution is not achieved, the third step is to contact the Director of Clinical Experiences, 304 White Hall, to explain the nature of the disagreement. If a resolution is not achieved, the fourth step is to contact the appropriate program coordinator and then the director of the appropriate school in your major, and finally, the Director of Education Preparation in 304 White Hall. The order is spelled out below:

1. The person with whom you have a disagreement
2. The University Supervisor
3. The Director of Clinical Experiences, 304 White Hall
4. Program Coordinator
5. School Director
6. Director of Education Preparation, Vacca Office of Student Services, 304 White Hall

Procedures for Addressing Problems, Misbehaviors, or other Discrepancies------------------

1. The student teacher, cooperating teacher, and university supervisor should meet together to cooperatively address problems as they arise. If needed, the Program Coordinator will
be contacted by the Director of Clinical Experiences for faculty advisement.

For serious problems or problems that continue after a warning has been issued, a **Student Teacher Professional Development Contract** will be developed by the cooperating teacher, university supervisor and student teacher. The contract describes the problem area(s) and an action plan, including a timeframe, to address the problem(s). The Supervisor will communicate with the Director of Clinical Field Experiences that a contract has been written. The Director will immediately advise the program coordinator.

2. Documentation of all actions pertaining to the implementation of the Professional Development Plan must be objective, accurate, and thorough.

3. If the terms of the contract are not met in the timeframe that has been established, then the supervisor, cooperating teacher, program coordinator and/or program faculty member and the Director of Clinical Experiences will meet with the student teacher to determine further actions. These actions may include remediation or additional work prior to returning to student teaching, readjustment of schedule, removal from student teaching, time extension of student teaching in current placement, new placement, graduation without licensure (after filing a change of major or minor form), or other options as appropriate. The student teacher is welcome to bring an advocate to this meeting, however, discussion will be held primarily with the student teacher, not the advocate.

**IMPORTANT NOTE:** If for any reason the actual school administration requests that a student teacher be removed from the classroom, the Vacca Office of Student Services will comply with this request. For other serious situations, the Director of Clinical Experience will confer with the school district administration, cooperating teacher, university supervisor, and KSU Faculty to determine whether or not a student teacher remains at the current placement site.

4. If the team agrees that the student teacher should be removed from student teaching, the grade for student teaching will be determined at the meeting with the student teacher. Attendance in other coursework taken in conjunction with student teaching (e.g., Inquiry IV) will be discontinued and repeated at the same time that student teaching is finally completed.

5. **When considering removal and/or withdrawal from Student Teaching, University policy stipulates that the last day of the 10th week of the university semester is the last date a student can WITHDRAW from a class. After that date, students will receive a “U” in student teaching.**
Section II: Student Teacher
Section II: Student Teacher

Role of the Student Teacher

Successful student teaching is a collaborative effort. Student teachers must realize their responsibilities as learners, studying the teaching-learning process, and as co-teachers, increasing instructional responsibilities from day-to-day.

In general, student teachers will follow the same policies and expectations for licensed teachers. The cooperating teacher should provide clear directions and closely monitor the student teacher’s behaviors in this regard in order that misunderstandings not occur.

Specifically, the student teacher’s responsibilities include:

- giving student teaching responsibilities first priority even though there may be other personally compelling concerns;
- being punctual in arriving at school, at scheduled classes and at meetings in accordance with school regulations;
- notifying the cooperating teacher as well as the university supervisor as far in advance as possible when absence cannot be avoided;
- conducting himself/herself in a professional manner at all times, including dress, speech and personal habits;
- becoming acquainted with and abiding by school policies;
- maintaining confidentiality about students or school personnel;
- being observant, showing interest and initiative, and being prepared when responsibilities have been assumed;
- demonstrating teaching skills that include integration of technology and differentiated instruction;
- providing the cooperating teacher and university supervisor with lesson plans in advance for feedback in accordance with guidelines established;
- demonstrating effective classroom management skills;
- demonstrating self-reflection and welcoming constructive feedback;
- performing non-instructional duties within and outside the classroom if these are expected of the cooperating teacher;
- demonstrating the ability to assume full teaching responsibilities during student teaching;
- attending seminars, meetings and/or in-services by the school;
- keeping the university supervisor informed about progress, problems or any other matters needing the supervisor’s attention;
- attending school functions such as PTA meetings, faculty meetings and other events that teachers normally are expected to attend with the approval of the building principal;
- gaining an understanding of the community life as it relates to the school district through visitation to local community agencies and attendance at various community activities.
The Teacher Performance Assessment (edTPA) ---------------------------------------------

The Teacher Performance Assessment (edTPA) is a subject area-specific, performance-based assessment for pre-service teacher candidates, focused on student learning. Developed at Stanford University, this portfolio process will evaluate a teacher candidate’s ability to create and assess an effective lesson sequence, teach all students, and reflect on the teaching process. Each teacher candidate will develop a portfolio of artifacts, including lesson plans, video clips of instruction, student work samples, teacher assignments, analyses of student learning and reflective commentaries. Specifics necessary for each portfolio are clearly designated in edTPA handbooks. Materials, including all handbooks and templates for each portion, guides on making good choices and others items to support your completion of your edTPA portfolio, will be available online for all student teachers via Blackboard (see the edTPA Student Teaching page) and all can also access materials via the student site of www.edtpa.com. In the early weeks of the student teaching semester, the teacher candidate will distribute a letter to inform students and parents of the edTPA process, including the video clips necessary for the portfolio (see the sample Permission Letter on page 59). A consent form will be collected by the teacher candidate to obtain parent/student permission to participate in the edTPA process (see sample Permission Form on page 60). The edTPA is due to be uploaded no later than the Friday of the 10th week of the semester, but a program or the inquiry course may designate an earlier due date. **Completion of the edTPA is one of the requirements for passing student teaching. Completion is defined as submission with no condition/error codes, with the opportunity to remediate.**

Reflective Teaching ---------------------------------------------

During the student teaching semester, student teachers are encouraged to reflect on their practice, connecting fieldwork experiences and knowledge learned in coursework. As they develop their ability to function as professional problem solvers, new student teachers should begin to engage in reflective teaching.

Effective instruction requires teachers who are empowered, careful thinkers about their day-to-day interactions with students--teachers who are able to reflect on their practice. This, in turn, helps teachers better understand the teaching/learning context.

There are no easy answers to the problems student teachers encounter in their particular situations. As beginning teachers and new professionals, they will need to develop the ability to identify and understand problems of practice, hypothesize alternatives, place new actions into practice, and evaluate the results of their teaching. In other words, they need to think about their practice and the impact on student learning.

Opportunities to Engage in Reflection ---------------------------------------------

Throughout their teacher education program, student teachers have encountered the concepts of inquiry and reflection. In courses, field experiences and inquiry seminars, they have, to some extent, engaged in activities conducive to reflective teaching. What are the major opportunities to engage in reflection during the student teaching semester?
Inquiry into Professional Practice (Inquiry IV), the student teaching seminar, is required of all student teachers except graduate level students in Special Education. Action research projects, in which student teachers inquire into a practical problem, are designed and conducted in their placement sites. Dialogue and group discussion sessions take place in seminar for student teachers to discuss their problems, offer solutions and provide a support system for one another. Writing about their joys and frustrations, successes and failures, daily happenings, reflections, lessons learned, etc., in journals or logs may be an individually chosen activity or seminar assignment. Conversations and interactions with mentors, cooperating teachers and university supervisors who take a supportive stance and provide constructive feedback give student teachers the understanding necessary to problem solve and reflect.

Life After Student Teaching

Career Exploration and Development Center (CEDC)

Take full advantage of the numerous benefits that involvement with the Career Exploration and Development Center (CEDC) at Kent State University affords you! Let this office serve as your connection to being a future educator. Over the years, thousands of new teachers have used Career Services as a key resource in their job search. The office is conveniently located in Room 261, Schwartz Center, directly above the Admissions Office. Hours of operation are 8:00 a.m.-5:00 p.m., Monday-Friday. We have an array of programs and services designed to assist you in your education job search. Some require pre-registration so early preparation is essential. Since student teaching requires immense time and energy, connecting with Career Services prior to this busy last semester is crucial. Allow CSC to serve as your job search support network. Plan ahead and you won't be disappointed!

The following special events for educators are planned each year. Review the Career Development and Exploration website at www.kent.edu/career for more details.

Education SuperStart Saturday: Date TBA (one fall term and one spring term) – Location TBA

A 2-1/2 hour education job search preparation workshop offered ONLY twice a year. Topics covered include; Career Services registration, current education supply/demand statistics, how to organize and conduct your education job search (including details about Teacher Interview Day—see below), resumes, cover letters, and more. For more information visit http://www.kent.edu/career/news/newsdetail.cfm?newsitem=1D609022-9725-D0B2-9AF0B1C21D815B46

On-Campus Interviews: Education interviews at Teacher Interview Day (Date TBA) and the Career Services Center, all require on-line pre-registration with their Experience Job and Internship Board. This service is free for currently enrolled students and alumni. Each year, a number of school districts and school administrators, representing districts in Ohio and numerous other states, have interviewed student teachers from the convenience of the Kent State Student Center Ballroom and the Career Services Center. These are for full-time teaching and administrative positions beginning the following Fall so only graduating
seniors and alumni may participate. Most cooperating teachers and supervisors allow you to participate in these events. However, you must inform them in advance of your intentions to attend. For specifics about Teacher Interview Day, read the Student/Alumni Timeline by clicking on Teacher Interview Day on our Calendar of Events on our website.

Other services of value to education majors include:

CEDC Website—www.kent.edu/career offers a wealth of information for all your career and job search needs. As mentioned, registration with their Experience Job and Internship Board is required to utilize on-campus interviewing as well as to search job postings sent to them specifically for KSU students/alumni. Additional information pertinent to education majors is also available in their Delicious web link bed at http://www.delicious.com/ksu_career_services/education. All it takes is a little surfing to find information on resume writing and links to valuable education websites where jobs can be found or schools can be researched.

Employment Service. In addition to on-campus interviews, student/alumni resumes are referred out in response to requests by school districts, both in and out-of-state.

Counseling/Mock Interviews. Appointments with our Education Career Specialist are available for individual career concerns. Additional assistance is available during Monday-Friday drop-in counseling from 11:00-12:30 and 2:00-4:00 year-round, including school breaks.

Career Resource Library. Contains numerous education resources: job vacancies and job fairs in education and other career fields, computers with Internet usage, school district contact information, books and videos on the education interview and resume writing process, how to create a portfolio, and more! Everyone is always impressed with the extensive bound resources they have exclusively for education students. A return visit ends up being a must!

You are to be commended on all your academic achievements thus far. With graduation just around the corner, the Career Exploration and Development Center wants to help make your transition into the professional education world a smooth one, and your first job a reality. Some final thoughts to consider…

Employment tips suggested by school administrators attending our Teacher Interview Day:
- Have a strong understanding of strategies used to meet differing learning styles.
- Be familiar with methods used to integrate technology into the curriculum.
- Know what professional attire is best for an interview and if a portfolio is required.
- Thoroughly research the school district and community.
- Be familiar with block scheduling, inclusion settings, cooperative learning strategies, and behavior management techniques.

For additional information visit with a Career Counselor in our office and attend an education related job search preparation workshop (for dates check our Calendar of Events on our website).

The experienced staff of the Career Exploration and Development Center looks forward to serving your needs today and in the near future! Visit us soon!
National Board for Professional Teaching Standards Certification

Is it in Your Future? The National Board Certification process is a demanding task intended to provide a reflective professional development experience by putting one’s teaching practice under the microscope of intense self-evaluation. It is for experienced teachers with a minimum of three years experience in the classroom.

How Did Board Certification Evolve? As a consequence of concerns raised by the 1983 federal report, “A Nation at Risk” and the 1986 report for the Carnegie Task Force on Teaching as a Profession, the National Board for Professional Teaching Standards was established in 1987. Its purpose was to establish high and rigorous standards for the measurement of teaching practice, leading to a higher level of performance by both teachers and students-nationwide.

On What are the Standards Based? The standards for each certification area are based on five core propositions that summarize what teachers should know and be able to do. The propositions are:

1. Teachers are committed to students and their learning.
2. Teachers know the subjects they teach and how to teach those subjects to students.
3. Teachers are responsible for managing and monitoring student learning.
4. Teachers think systematically about their practice and learn from experience.
5. Teachers are members of learning communities.

When Will I Be Eligible? After attaining three years of experience in the classroom, teachers holding a baccalaureate degree are eligible to seek this prestigious verification of commitment to professionalism and the improvement of student learning. The voluntary certification process involves a detailed self-assessment of your practice in the classroom as reflected in video tapes, activities, knowledge of teaching pedagogy and knowledge specific to your subject area or student grade level. When completed, there will be more than thirty certificate fields with standards developed by teachers and others with an interest in education.

What Are the Benefits? National board certified teachers serve as models for what it means to be an accomplished teacher. As such, they work in leadership roles for the advancement of education. They use their expertise to inform education policy decision makers. They often function in expanded building and school system roles.

While National Board Certification does not replace licensing, which certifies that you have met your state’s minimum standards, it may allow license portability or meet requirements for renewing a license. Incentives and rewards are offered by many states. Visit the National Board for Professional Teaching Standards Web site at www.nbpts.org for current information.
Section III: Cooperating Teacher
Section III: Cooperating Teacher

Role of the Cooperating Teacher

The University is grateful to the cooperating teachers who collaborate with us in implementing an important final step as our student teachers prepare to begin their teaching careers. The role of the cooperating teacher is complex. It involves mentoring and at the same time evaluating teaching practice and professional dispositions. It involves helping to socialize the student teacher to established norms of the classroom and school, sharing the wisdom of experience, and yet at the same time respecting and encouraging innovations. We also hope this experience will provide cooperating teachers an occasion for professional growth.

The following list contains the expectations as cooperating teachers prepare to assume this important role:

- Working with a Student Teacher takes time and commitment, along with patience and understanding; providing positive feedback for successes, and constructive interventions for challenges.
- It is expected that the Cooperating Teacher will accept the responsibilities required of the experience, and carry them out in a professional and collaborative manner.
- It is preferred that Cooperating Teachers have a ‘5 year professional license’, and at least three years of experience in their current assignment. Any exceptions will be made at the discretion of the Director of Clinical Experience.
- prepare the learners, their parents, and the classroom for the student teachers arrival;
- demonstrate an attitude of openness and inquiry into teaching practice;
- demonstrate for the student teacher how the academic content standards are used on a daily basis in planning, teaching, and assessing student learning;
- demonstrate a positive attitude toward all learners and a belief that all students can learn;
- assist the student teacher in understanding the importance of health and safety practices in the classroom environment;
- provide multiple opportunities for the student teacher to interact with families in meaningful and appropriate ways and help the student teacher to become aware of community resources that support the learner and his/her family;
- explain the role of all school personnel to the student teacher including, but not limited to: guidance counselors, media specialists, and administrative and support personnel.
  Introduce the student teacher to these personnel;
- share with and demonstrate for the student teacher ways to meet the needs of a diversity of learners including, but not limited to, students with ethnic, racial, gender, linguistic and socioeconomic differences;
- assist the student teacher in integrating technology into teaching;
- model professionalism through appearance and relationship with colleagues and families;
- maintain open communication with the student teacher and the university supervisor;
- define expectations for the student teacher in a reasonable and clear manner so that an atmosphere of mutual trust and respect can be established and maintained;
• encourage the student teacher to observe other subject areas, grade levels, and instructional practices;
• inform and invite principals/assistants to observe and provide feedback to the student teacher;
• preview and observe lessons and provide constructive feedback on a regular basis during both unscheduled and scheduled time;
• review current classroom management plan and assist the student teacher in developing effective management strategies;
• complete a mid-term student teaching assessment during the 7th week of the KSU semester and a summative student teaching assessment during the final week of student teaching (discuss assessments at a meeting with the university supervisor and student teacher);
• provide information to the university supervisor regarding the student teachers dispositions toward teaching as defined in the Disposition Assessment;
• meet with the university supervisor and student teacher as needed.

In the spirit of reflective practice the University will ask cooperating teachers and student teachers to assess this experience. We will use this information to help us strengthen our service to cooperating teachers and future student teachers.

The Teacher Performance Assessment (edTPA)---------------------------------------------------------------

The Teacher Performance Assessment (edTPA) is a subject area-specific, performance-based assessment for pre-service teacher candidates, focused on student learning. Developed at Stanford University, this portfolio process will evaluate a teacher candidate’s ability to create and assess an effective lesson sequence, teach all students, and reflect on the teaching process. Each teacher candidate will develop a portfolio of artifacts, including lesson plans, video clips of instruction, student work samples, teacher assignments, analyses of student learning and reflective commentaries. Specifics necessary for each portfolio are clearly designated in edTPA handbooks. Materials, including all handbooks and templates for each portion, guides on making good choices and others items to support your completion of your edTPA portfolio, will be available online for all student teachers via Blackboard (see the edTPA Student Teaching page) and all can also access materials via the student site of www.edtpa.com. In the early weeks of the student teaching semester, the teacher candidate will distribute a letter to inform students and parents of the edTPA process, including the video clips necessary for the portfolio (see the sample Permission Letter on page 59). A consent form will be collected by the teacher candidate to obtain parent/student permission to participate in the edTPA process (see sample Permission Form on page 60). The edTPA is due to be uploaded no later than the Friday of the 10th week of the semester, but a program or the inquiry course may designate an earlier due date. Completion of the edTPA is one of the requirements for passing student teaching. Completion is defined as submission with no condition/error codes, with the opportunity to remediate. Acceptable guidance guidelines can be found at: http://www.edtpa.com/Content/Docs/GuidelinesForSupportingCandidates.pdf.
Guidelines for the Cooperating Teacher

The following list of suggestions is a means of preparing student teachers to be appropriately involved in the school environment and community. The list is representative, not limiting.

What to do prior to the first day of student teaching:

- Read the student teachers information form thoroughly, including personal interests and hobbies. In the case of MAT student teacher’s, read their resume.
- Prepare students for the arrival of the student teacher and explanation of his/her role.
- Provide the student teacher with an introduction to the school principal.
- Provide a brief tour of the immediate instruction area so the student teacher will know where to “hang a hat” on the first day of his/her actual scheduled arrival.
- Provide the student teacher with appropriate textbooks and reference materials for perusal.
- Provide the student teacher with a school handbook, or online link, if available, so he/she may become familiar with school rules and regulations.
- Provide the student teacher with contact information (email addresses and phone numbers) to use in the event that questions arise which need to be communicated.
- Provide the student teacher with a thumbnail sketch of yourself, including professional and instructional expectations.
- Discuss the schedule for the student teaching, including the time period, and the procedure for submitting lesson plans for review.
- Invite the principal to be an active participant in the student teacher’s experience, which could include activities such as sharing the school mission for teaching and learning, acquainting student teacher with a school-wide perspective of the student population and community demographics, make periodic classroom visits, and observe a lesson and give feedback to show how classroom activities fit into the school’s overall instructional goals.

What to do on the first day of student teaching:

- Take the student teacher on a general tour of the entire building. Show the student teacher the school’s facilities, i.e., restrooms, faculty lounge, teacher work room, and cafeteria and explain prices, lunch schedule, lunch duties (if any) and disposal of trash, trays, silverware, etc.
- Make sure the student teacher understands expected hours of arrival and departure and parking regulations, etc.
- Give the student teacher a copy of the daily schedule, map of the school, etc.
- Acquaint the student teacher with room policies. Explain expected school dress regulations (especially physical education, shop, lab, and classroom etiquette).
- Make as many faculty introductions as possible, including the principal and school office personnel.
- Introduce the student teacher to each class and involve students in getting acquainted.
- Give the student teacher his/her own space for personal materials.
- Define the student teachers authority in the classroom.
- Explain building policy and procedures for absences, bomb threats, evacuations, etc. Remind the student teacher to also notify his/her university supervisor.
• Schedule or set aside a regularly planned meeting time each day/week.
• Review the district policy on reporting suspected child abuse and neglect and how this reporting is conducted in the district/school.
• Review social media policies as it applies to staff and students.

What to explain to the student teacher during the first week of student teaching:
• Lesson plan procedures. (Provide the student teacher with a copy of lesson plan format or schedule.)
• Grading system and school’s philosophy about grades.
• Discipline procedures on gum chewing, “romance in the halls,” injurious horseplay, weapons, possession of personnel electronic devices of any type, using inappropriate photos and text on social networking sites, etc.
• Attendance, tardy reports and excuses. Duplicating procedures.
• School calendar. (Invite the student teacher to any scheduled PTA meetings, sports, events, etc., and made sure he/she receives a complimentary pass.)
• Access to guidance files for student records, guidance materials, test scores.
• Procedures for signing up for technology equipment/computer labs.
• Fire drill regulations, tornado warning procedures, bomb threat procedures, and lockdowns.
• First aid policies and procedures (especially in labs and shops). Identify those afflicted with epilepsy or diabetes, bleeding, bee sting allergy, etc.
• Hall passes, library passes, recess duties, eligibility slips, etc.
• Local community activities and where churches, museums, theaters, restaurants, bowling alleys, etc., are located if she/he is a stranger to this immediate area.

What to do after the first week of student teaching:
• By the end of the second week, observe the student teacher, have a post conference and give the student teacher an opportunity to discuss the session that was observed.
• By the end of the fourth/fifth week, observe the student teacher, have a midterm conference with the university supervisor and student teacher to give an opportunity to dialogue about the student teaching experience that was observed.
• Continually observe the student teacher and provide verbal and written feedback.
• By the end of the sixth week, observe the student teacher, have a post conference and give the student teacher an opportunity to dialogue about the session that was observed. Invite the principal to observe the student teacher.
• By the end of the seventh/eighth or ninth/tenth week, observe the student teacher. Schedule a summative conference with the university supervisor and student teacher to give an opportunity to discuss the entire student teaching experience.
• Make the schedule of teaching flexible enough to permit the student teacher to observe other classrooms thus giving an opportunity to become acquainted with the many possible environments in which he/she may someday find himself/herself teaching.
• Invite the student teacher to participate in professional organizations on local, state and national levels when feasible or permissible.
• Help the student teacher to work individually with “at risk” students to enable them to
remain in school.
- Give the student teacher adequate opportunity to formulate his/her own assessment ideas.
- Use mini-teaching techniques in helping the student teacher plan assignments.
- Suggest and provide the means for the student teacher to audiotape or videotape himself/herself in a classroom, outside the Teacher Performance Assessment (edTPA) requirement.

**What to do during the last week of student teaching:**
- Make sure the student teacher has graded and returned all papers to students and materials to myself or other teachers, library specialist, etc.
- Help the student teacher bring closure to any reports, grade book, assignments and classes/students.
- Allow the student teacher to observe other classrooms.
- Maintain open communication among the student teacher, university supervisor and myself.
- Invite the student teacher to keep in touch with at least a phone call, an email, or through other communication means.
- Give the student teacher constructive criticism as well as praise.
- Complete all evaluations.
- Share summative Student Teaching Assessment with the student teacher at a final conference.
- Schedule time for an exit interview between the student teacher and principal.
Section IV – University Supervisor
Section IV – University Supervisor

Role of the University Supervisor

The overriding role of the university supervisor is to be a facilitator in the student teaching triad and a liaison between the school and the University to ensure the quality and integrity of the teacher education program. In addition, the university supervisor acts as an advocate for the profession of teaching.

Specifically, the university supervisor’s responsibilities include:

- contacting each student via phone or email no later than the end of the student’s first week of placement (use your kent.edu email account for all electronic communication with students);
- conducting an orientation session no later than the end of the second week of the student teaching placement with the cooperating teacher and student teacher (inviting the principal to this session is recommended);
- providing cooperating teacher with their packet of information and Expectation Handbook;
- scheduling observation visits and providing constructive suggestions in writing to the student teacher;
- conferencing with the student teacher (and cooperating teacher if possible) following each observation;
- alerting the Director of Clinical Field Experiences in the Vacca Office of Student Services when unresolved problems arise, co-writing a Professional Development Contract (sample copy in forms section) if necessary, and providing information to the "team" at the University to help resolve problems with the student teacher;
- being available to the student teacher, the cooperating teacher, and the principal whenever guidance is needed;
- preparing Student Teaching Assessment forms provided by the University by established deadlines.
- Facilitating the completion of the Teacher Performance Assessment (TPA) process to the extent allowable.

The Teacher Performance Assessment (edTPA)

The Teacher Performance Assessment (edTPA) is a subject area-specific, performance-based assessment for pre-service teacher candidates, focused on student learning. Developed at Stanford University, this portfolio process will evaluate a teacher candidate’s ability to create and assess an effective lesson sequence, teach all students, and reflect on the teaching process. Each teacher candidate will develop a portfolio of artifacts, including lesson plans, video clips of instruction, student work samples, teacher assignments, analyses of student learning and reflective commentaries. Specifics necessary for each portfolio are clearly designated in edTPA handbooks. Materials, including all handbooks and templates for each portion, guides on making good choices and others items to support your completion of your edTPA portfolio, will be available online for all student teachers via Blackboard (see the edTPA Student Teaching page) and all can also access materials via the student site of www.edtpa.com. In the early weeks of the student teaching semester, the teacher candidate
will distribute a letter to inform students and parents of the edTPA process, including the video clips necessary for the portfolio (see the sample Permission Letter on page 59). A consent form will be collected by the teacher candidate to obtain parent/student permission to participate in the edTPA process (see sample Permission Form on page 60). The edTPA is due to be uploaded no later than the Friday of the 10th week of the semester, but a program or the inquiry course may designate an earlier due date. **Completion of the edTPA is one of the requirements for passing student teaching.** Completion is defined as submission with no condition/error codes, with the opportunity to remediate.

**Assessment Deadlines**

These deadlines are:

- **The Mid-Term Assessment** is to be submitted online by the university supervisor by Friday of the 7th week of the UNIVERSITY SEMESTER.
- **The Disposition Assessment** is to be submitted online by the university supervisor by Friday of the 7th week of the UNIVERSITY SEMESTER. The Disposition Assessment may be entered earlier if warranted. The disposition must be submitted in a timeframe that allows the student to enter a Professional Disposition Plan (PDP) and enact that plan. Students with outstanding dispositions are not cleared for graduation.
- **The Teacher Performance Assessment** (edTPA) is to be completed no later than the end of the 10th week of the semester, unless the program has an earlier due date. **Completion of the edTPA is one of the requirements for passing student teaching.** Acceptable guidance guidelines can be found at: [http://www.edtpa.com/Content/Docs/GuidelinesForSupportingCandidates.pdf](http://www.edtpa.com/Content/Docs/GuidelinesForSupportingCandidates.pdf).
- **The Summative Assessment** is to be submitted online by the university supervisor by the Friday of the 15th week of the UNIVERSITY SEMESTER.
- **The final grade** (S or U) must be received by the Director of Clinical Field Experiences on or before the last day of student classes of the university semester. This is the week preceding final exam week. The grade may be delivered or mailed to 304 White Hall on the grade submission sheet from the supervisor packet. Another option is to email the grade on or before the deadline to the Director of Clinical Field Experiences. However, the only email that can be accepted is one that has been sent by the university supervisor from his/her "kent.edu" web address. No other outside email accounts are recognized as official documentation.

**Guidelines for the University Supervisor**

**Getting Started the First Week**

1. Contact the student teacher and cooperating teacher to set up an orientation meeting at the school. Give the cooperating teacher their packet of information and Expectation Handbook. Introduce yourself to the principal when you visit the school. Find out what procedure the principal wishes you to follow upon subsequent visits to the building with regard to parking, checking in at the office, observing, etc.
2. Invite the principal to take an active role with student teachers that could include activities such as sharing the school mission for teaching and learning, acquainting student teachers with a school-wide perspective of the student population and community demographics, make periodic classroom visits, and observe a lesson and give feedback to show how classroom activities fit into the school’s overall instructional goals, explaining the district policy on child abuse and neglect reporting, and use of social media.

3. Use the initial visit with the cooperating teacher and the student teacher to discuss all evaluation forms, procedures and expectations of the student teaching experience. This is also the best time to deal with any concerns the cooperating teacher and the student teacher may have. Gather information regarding the beginning and ending times of the school day, lunch time, recess time and specialist time, such as art, music, etc. Note any holidays and procedures for school closing. Review the format of observations.

4. Maintain a personal file for each student. Keep a schedule for observations and try to vary the time and day you observe.

5. Help the student teacher to plan effectively. This planning begins with knowing the students’ backgrounds and developing clear learning goals. Lesson plans are a vehicle to help the student teacher organize the material that is to be taught. While there is general agreement that good planning contributes to good teaching, there is no widespread agreement that any particular format is best. For all observations, the lesson plans should be delivered ahead of time for university supervisor review.

6. Recommend that lesson plans during the first weeks of student teaching be extensive and specific. The cooperating teacher should examine and approve all lesson plans developed by the student teacher ahead of time. In order to help the cooperating teacher analyze the teaching plan and to make suggestions for improvement, the following questions are posed:

- Is the student teacher's planning a strategy for achieving the learning objectives?
- Has the student teacher made provision to inform the students of the objectives of the learning activity and their importance?
- Has the student teacher planned for the active involvement and contribution of students?
- Has the student teacher allowed for students to function within a reasonable range of interest levels and abilities?
- Is there sufficient change and variety of learning activities to recognize students’ attention spans?
- Does his/her teaching strategy include helping students with learning processes as well as learning outcomes? (Learning processes include communication skills, study habits, methods of inquiry, library and resource skills, outlining and organization, formation of work schedules, establishing personal goals and critical self-evaluation.)
- Do they use higher-order questions, those relating to strong teaching values? Do they show thorough pre-thought, using questions stated in the teaching reference?
- Has the student teacher considered how the various learning aids--chalkboard, bulletin board, artifacts, audiovisual equipment, and technology--are to be employed?
Has the student teacher followed appropriate policies and procedures if supplies were required?
Has the student teacher planned a distinct closure of the learning activities with a summary of important learning outcomes and a statement of the extent to which the objectives have been achieved?
As a final general consideration, will the students tend to view the lesson taught from this plan as a worthwhile learning experience?

Lesson Planning

Dates, times and subjects should be well marked at the beginning of each plan. Learning goals and objectives (standards and benchmarks) should be stated clearly. Procedures for carrying out the lessons should be explained in detail, including classroom management strategies and special directions. Teaching strategies should accommodate the various learning styles and levels in the classroom. Materials needed for the lesson should be listed clearly, along with textbooks, page numbers, handouts, etc.

Stress to the student teacher that someone else should be able to teach from the plans. Assessments to be used should be clearly defined.

As the class load increases for the student teacher and he/she feels confident about his/her planning ability, the cooperating teacher and university supervisor should cut back on the detailed plans. Have a sample of a more general plan ready for the student teacher to use as a guide for the remainder of the semester.

Lesson plans are a vehicle to help the student teacher organize the material that is to be taught. These plans should reflect a variety of methods to be used in teaching the material, authentic assessments and, most of all, should reflect the impact they will have on student learning.

Professionalism and Reflective Practice Through Conferencing

Conferencing is important during the student teaching experience. Conferences clarify the elements of good teaching. As needed, constructive feedback is offered, and plans, including a commitment for change, are made. As part of the Kent State University student teaching team, the cooperating teacher's and university supervisor's role as active professionals and lifelong learners will depend on the ability to apply reflective practice based on the achievement of the learning goals. Therefore, the ultimate conference goal is to help student teachers become reflective, self-analyzing and self-evaluative professionals. In order to achieve this objective, the participants must be prepared to learn from others and to contribute their own ideas and perceptions.

Conferencing helps the student teacher begin to engage in professional growth and development. In the conference phase, the planning, constructive criticism and analysis of good teaching are the major responsibilities of the cooperating teacher and the university supervisor; toward the end of the placement, student teachers should assume responsibility for reflective self-analysis.

Informal conferences should be held at the end of each teaching day by the cooperating teacher and the student teacher. A formal pre-teaching conference, a written evaluation of a lesson and a post-teaching conference should be held once a week by the cooperating teacher and student
teacher. A weekly meeting should be held to discuss plans, instructional materials and techniques, information about students, instruction, personnel and other areas of professional growth. Sufficient time should be made available to complete the three phases of the conference. Some of these conferences should be three-way and include the student teacher, cooperating teacher and university supervisor. The setting should provide a suitable area that is conducive to a mutual exchange of ideas.

The focus of the conference varies from pre-observation to post-observation. In the pre-observation conference, objectives and techniques of the intended instruction are discussed and questions are formulated that will aid in the observation of the lesson to be taught. The post-observation conference focuses on perceived needs and/or questions of the student teacher, cooperating teacher or university supervisor.

While more frequent conferences will occur between the student teacher and cooperating teacher because of their daily interactions, the university supervisor should participate in a three-way conference at least every other week.

The most important aspect of conferencing is not the topic(s) or procedures but the opportunity for an open exchange that permits and encourages reflection. Techniques to create this type of exchange are difficult to describe because they are individualized to participants and situations. However, the student teacher, cooperating teacher and university supervisor must recognize and accept responsibility for the success and productivity of conferences. There are a number of conferencing techniques that generally are applicable for use by the cooperating teacher and the university supervisor:

1. **Use climate-building verbal and nonverbal behaviors to develop a personal relationship between the cooperating teacher, the student teacher, and the university supervisor.** Climate-building comments are those that reflect interest and respect for all members of the student teaching team.

2. **Be a good listener.** Hear each other’s comments. Be alert to nonverbal clues, sensing unexpressed concerns, and dealing with the student teacher’s or the cooperating teacher’s problems.

3. **Focus on the descriptive rather than the evaluative when referring to the student teacher’s performance.** If criticism is necessary, rely on description and guide the student teacher to consider the implications of the criticism using the teacher standards and criteria as a point of reference.

4. **Use systematic questioning** that helps the student teacher focus on thinking, organizing ideas, engaging in self-evaluation and arriving at conclusions and/or insights.

5. **Paraphrase a student teacher’s response** to get clarification, focus, or emphasis.

6. **Seize opportunities to encourage supportive comments throughout the conference.** Cooperating teachers and university supervisors should be honest in giving feedback but it should be tempered with reassurance, especially if they sense frustration and disillusionment in the student teacher.
7. Close the conference with a review of the major outcomes/decisions, solutions, insights, conclusions, commitments/mutual agreement of expectations.

The student teacher should not reach the end of a student teaching experience without having had at least one formal conference every two weeks of the placement with the cooperating teacher and the university supervisor.

Student Teacher Conferences

1. Make clear to the student teacher your role in the student teaching process. Give the student teacher the opportunity to discuss his/her goals and objectives during the student teaching experience. Emphasize professional attitude, enthusiasm, promptness, dress and preparedness.

2. Allow the student teacher to discuss concerns about his/her lessons. As the student teacher begins to suggest changes to improve lessons, use that as a basis for your conference. At first, select only the more general concerns: as the evaluation progresses, and as the student teacher becomes more confident, you can address some refinements of his/her teaching.

3. Try to gain a sense of what the cooperating teacher expects from this student teaching experience.

4. Remember the cooperating teacher is providing a classroom in which the student teacher can practice what he/she has learned. Include the cooperating teacher in the evaluation process. If things are not going well, try to make suggestions rather than demands. If the cooperating teacher wishes his/her student teacher to conform to his/her teaching approach, maintain a position to support and guide the situation.

5. Conferences should be held after each observation, at the midterm, and at the summative with the student teacher, the cooperating teacher and the university supervisor present. Principals should be invited to observe the student teacher and give feedback.

6. Be specific in your comments. Try to use "conferencing" skills that encourage the student teacher to reflect on the act of teaching and the impact on student learning.
Section V – Sample Forms
Instructions for University Supervisors to Use the Student Teaching Observation/Evaluation Form

Before the observation:
- Review the Midterm/Summative Student Teaching Assessment
- Schedule the observation for a time when the student teacher and cooperating teacher are available to meet before/after the observation
- Review the lesson plan

During the observation:
- Refer to the Midterm/Summative Student Teaching Assessment during the observation
- Provide observations and evidence in the observation column and align with the Ohio Standards for the Teaching Profession (OSTP)

After the Observation:
- Meet with the cooperating teacher and student teacher (together if possible; individually if necessary)
- Discuss the observation and solicit observations and evidence from the student teacher and cooperating teacher
- Provide the opportunity for the cooperating teacher to present observations and evidence for those areas not observable during the lesson
- Collaboratively develop goals and strategies with a timeline for those areas needing improvement.
- Give the top copy to the student teacher, the second copy to the cooperating teacher and retain the third copy for your files. This form will provide the basis for your completion of the Midterm/Summative Student Teaching Assessment.

Instructions for Completion of the Midterm/Summative Student Teaching Assessment

Note that the Midterm/Summative Student Teaching Assessment includes the rubric for evaluating the teacher candidate.

Completion of the Midterm Student Teaching Assessment
Prior to meeting with the cooperating teacher:
- Complete the Midterm Student Teaching Assessment
- Review the Student Teaching Observation Forms for evidence

Meet with the cooperating teacher:
- Provide guidance to the cooperating teacher in the completion of his/her Midterm Student Teaching Assessment
- Discuss discrepancies – noting that differences in ratings are acceptable as perspectives and experiences with the student teacher are unique.
Meet with the teacher candidate (with the cooperating teacher if possible):
  • Review the Student Teaching Assessment
  • Provide the opportunity for the teacher candidate to provide evidence not previously shared
  • Discuss the plan of action as needed
  • All participants (teacher candidate, cooperating teacher and university supervisor) should receive a copy of the Student Teaching Assessments with written, signed, plan of action if needed.

Completion of the Summative Student Teaching Assessment
Prior to meeting with the cooperating teacher:
  • Complete the Summative Student Teaching Assessment
  • Review the Observation Forms for evidence
  • Place a numerical rating in the designated column

Meet with the cooperating teacher:
  • Provide guidance to the cooperating teacher in the completion of the Summative Student Teaching Assessment
  • Discuss discrepancies – noting that differences are acceptable as perspectives and experiences with the teacher candidate are unique

Meet with the teacher candidate (with the cooperating teacher if possible):
  • Review the Student Teaching Assessment
  • Provide the opportunity for the teacher candidate to provide evidence not previously shared
  • All participants (teacher candidate, cooperating teacher and university supervisor) should receive a copy of the Student Teaching Assessments

Note about the final score of the Summative Student Teaching Assessment
In order to earn a passing grade for student teaching, the candidate needs:
  ➢ Must successfully complete “17” of the Final/Summative Assessment items as “Met”, with no items marked as “Not Met”.
  ➢ Must have earned a ‘passing’ score on any ‘program area’ assessments.
  ➢ Must have satisfactorily completed any PDPs assigned for “Needs Improvement” on the Disposition Assessment.

Professional Disposition Assessment
Kent State University Teacher Education
Revised 3-4-2011

Rating: Not observed; Needs improvement; Acceptable (*Review “instructions” in the Faculty Portal)

Professional Dispositions: Professional attitudes, values, and beliefs, demonstrated through both verbal and non-verbal behaviors as educators interact with students, families, colleagues, faculty, and communities. These positive behaviors support student learning and development. We expect educators to demonstrate:

- Fairness in striving to meet the educational needs of all students in a caring, non-discriminatory, and equitable manner
- Belief that all students can learn
- Responsibility
- Professionalism

1. Strives to create a safe environment to meet the educational needs of all students in a caring, non-discriminatory, and equitable manner, based on the belief that all students will achieve to their full potential.
2. Demonstrates discretion when discussing students, peers, faculty, school/center by not participating in disparaging conversations and/or works to diffuse such language.
3. Establishes and maintains respectful and professional collaborative relationships with others.
4. Displays open mindedness, flexibility, and willingness to learn from others whose perspectives differ.
5. Respects and protects differences among groups of people and individuals based on ethnicity, race, socioeconomic status, gender, ability, language, political and religious orientation, sexual orientation, appearance and geographical area.
6. Consistently demonstrates initiative, interest in and enthusiasm for teaching and learning.
7. Accepts constructive criticism and adjusts behavior accordingly.
8. Is disposed toward inquiry, problem-solving, and reflection as demonstrated in meaningful and appropriate discussions.
9. Accepts and fulfills responsibility for decisions and actions.
10. Projects an appropriate professional appearance and demeanor in professional settings.
11. Demonstrates organizational skills.
12. Follows attendance policies for class and field experience/students teaching, including punctuality.
13. Prepares for class and field experience/student teaching and completes work in a timely manner.
14. Works with students and their families in appropriate ways.
15. Demonstrates appropriate and culturally sensitive verbal and nonverbal communication.
16. Understands and maintains confidentiality related to student records, personal family information, and student ability/disability in educational programming in order to protect the child’s and family’s privacy, unless disclosure serves a professionally compelling purpose or is required by law.
17. Obtains and uses audio recording, video recording, and still images of minors solely for course-related purposes only after having obtained written consent from the parent/guardian and the school/center. At all times, the educator protects the identities of individuals portrayed, never engaging in the public sharing of any digital images on social media sites, in public or private discourse, or for personal gain without explicit parent/guardian and school/center permission.
18. Observes all federal, state, local, and school board mandates, policies, and procedures pertinent to the teaching profession.
19. Understand, upholds, and follows professional ethics, policies and legal codes of professional conduct.
Cooperating Teacher Evaluation

Dear Parent/Guardian:

As a student teacher in your child’s classroom, I will be evaluated using the Teacher Performance Assessment (edTPA), an instrument that is currently being developed for use in Ohio and other states. The primary purpose of this assessment is to develop a valid and reliable assessment that can measure the performance of future teachers and lead to improvement of the programs that prepare them.

Although the purpose of the assessment is to evaluate my teaching, the project will include short video recordings of lessons taught in your child’s class, as well as samples of student work. In the course of taping, with your permission, your child may appear on the video recordings. If you choose not to give your permission, then your child will still participate in the classroom instruction as usual. S/He will just be seated out of camera range. Also, I will submit anonymous samples of student work as evidence of teaching practice, and that work may include some of your child’s work, with permission.

The video recordings and student work will be used solely for purposes of evaluating my instruction and for improving teacher preparation programs. The only people who see them will be teachers at the school and university faculty and supervisors. The recordings and/or student work will not appear on the Internet or in other public settings. Any samples of student work that I collect for this assessment will not contain the student’s last name.

Sincerely,

Teacher Candidate
Kent State University
TEACHER PERFORMANCE ASSESSMENT PERMISSION FORM

Student Name __________________________  School/ Classroom Teacher __________________________

I am the parent/legal guardian of the child named above. I have received and read your letter regarding the video and materials submission procedures to be used this semester as part of your student teaching assessment requirement, and agree to the following:

(Please check the appropriate box below)

☐ I DO give permission to you to video record my child and reproduce materials that my child may produce as he or she participates in a class conducted at

(Name of school) by (Student teacher name)

as part of classroom activities. No last names will appear on any materials submitted by the student teacher to his/her teacher preparation program or its agents.

☐ I DO NOT give permission to you to video record my child or reproduce materials as he or she participates in a class conducted at

(Name of school) by (Student teacher name)

Should you not grant permission for us to video record your child, your child will be seated at the back or side of the classroom so that he or she is not visible in the recording. Your child’s grade on this lesson will NOT be affected.

☐ I DO give permission to you to reproduce materials my child may produce; however, I DO NOT give permission to you to video record my child as he or she participates in a class conducted at

(Name of school) by (Student teacher name)

Should you not grant permission for us to video record your child, your child will be seated at the back or side of the classroom so that he or she is not visible in the recording. No last names will appear on any materials submitted by the student teacher to his or her teacher preparation program or its agents.

Signature of Parent or Guardian __________________________  Date __________________________

I am the student named above and am more than 18 years of age. I have read and understand the student teacher performance assessment requirements. I understand that my performance is not being evaluated and that my last name will not appear on any materials that may be submitted.

☐ I DO give permission to you to video record my participation in this class and reproduce materials that I may produce as part of classroom activities.

☐ I DO NOT give permission to you to video record my participation in this class or to reproduce materials that I may produce as part of classroom activities.

☐ I DO give permission to you to reproduce materials that I may produce as part of classroom activities but I DO NOT give permission to you to video record my participation in this class.
