1. Is there a document that you can share that further describes the cost breakdown for the deferred maintenance scope and renovation of the 13,000 SF area?
   a. No: that will be a combined effort between the CMR and A/E during design. The necessary sprinkler and abatement scope will be the priority with the balance of funds put towards finishes and programmed space.

2. On page 2 of the RFQ, section G., what is the “Select Secondary Discipline” line item in the Disciplines category?
   a. That is stray text: that’s the instruction from the base form that should have been deleted when we listed the engineers.

3. On page 2 of the RFQ, section H., should we include a Hazardous Materials consultant in our submission?
   a. yes
