

# Certificate in Educational Technology

## *Kent State University*

### ONLINE AND BLENDED TEACHING AND LEARNING

Online and blended education has become an important option for students today, in K-12 education, higher education, and other organizations. This certificate includes three courses (9 credit hours) that address issues associated with online and blended instruction, spanning designing courses, teaching courses, and examining the research in the area.

This certificate can be included with a master's degree in Educational Technology or obtained independently. It does *not* provide any certification from the State of Ohio. All of these courses are taught online, and some may include live class sessions delivered with synchronous online technology. Complete this program of study, indicating when you plan to take each course. Then have it signed by your advisor and submit it to the Graduate Education Office in 418 White Hall.
