INTRODUCTION

The mission of Kent State University is to “discover, create, apply and share knowledge; foster ethical humanitarian values; educate students to think critically; expand students’ intellectual horizons; and prepare students for responsible citizenship and productive careers.” To this end, students pursuing a Master of Public Health (MPH) will not only engage with faculty in the classroom but will also apply their knowledge and skills in “real world” settings with support and guidance from community preceptors and the College faculty. These practical experiences are gained throughout the MPH program of study and are particularly emphasized in the practicum. Completion of the practicum is also a requirement of all MPH programs accredited by the Council on Education for Public Health (CEPH).

SUMMARY OF THE PRACTICUM EXPERIENCE

Students should discuss with their academic advisor about the timing of course work. It is encouraged to start no later than 3 semesters before intended graduation date. After approval has been received, students will enroll in their department’s Practicum Experience course (i.e., HPM 60192) and will work with the Practicum Instructor to begin developing the practicum project. During this process, students reflect on their completed coursework, identify areas of interest for further study, develop a list of possible sites to conduct the practicum, identify MPH professional competencies to address, and generate a preliminary list of learning objectives and activities. In this stage, students are encouraged to think about the “next steps” in their careers and design a practicum project that will help them achieve those professional goals.

After students have developed a preliminary concept about the practicum project they would like to pursue, they will complete the Practicum Agreement Form. It is suggested that the student contact the practicum course instructor to review the concept, discuss placement sites and a preceptor, and further develop the learning objectives. After the Practicum Instructor approves the Practicum Agreement Form, it is signed by the student and preceptor.

The student will upload the form to Blackboard and keep the original for their files.

Completion of the practicum requires a minimum of 300 contact hours and the development and presentation of a portfolio. Ordinarily, this means that students will need at least two semesters to complete the required number of contact hours and develop and present a high-quality portfolio. Details on the requirements of the portfolio and presentation are contained in this document.

The practicum is graded on a “satisfactory/unsatisfactory” basis and the grade is recorded in the student’s academic record. The grade is based upon the quality of the portfolio, the presentation, preceptor evaluation, student evaluation, and faculty assessment.

PRACTICUM SITE AND APPROVAL PROCESSES

Practicum projects can be completed in a variety of settings outside of the College, including health departments, non-profit organizations, hospitals, and other community-based organizations. Host sites must sign an Affiliation Agreement to host a practicum student and the site must be approved by the Practicum Instructor. Additional levels of approval may also be required.

International Practicum Projects

Students wishing to conduct their practicum outside of the United States, must obtain additional approval by the Office of Global Education (OGE) and must follow additional guidelines, including immunization and vaccination, additional health insurance, and other requirements. Students should be aware that the University and College reserve the right not to approve practicum projects in foreign countries, especially countries with travel restrictions or advisories. Students wishing to conduct their practicum projects in foreign countries must expect and budget additional time to complete the approval process. See the OGE web site for more information: <http://www.kent.edu/globaleducation>

Practicum Projects at the Student's Place of Employment

Students wishing to conduct a practicum project inside their place of employment must also obtain additional approval by the Practicum Instructor. Practicum projects occurring at the student's place of employment must have a scope of work that is "above and beyond" the student's normal job duties. Verification from the student's supervisor may be requested.

EXAMPLES OF PRACTICUM PROJECTS

A practicum project serves as evidence of the student's ability to apply knowledge and skills gained in coursework to a public health problem. Practicum projects can take many forms, depending upon the student's discipline and interests. Examples of practicum projects by discipline include, but are not limited to:

Biostatistics

- Analyze and report complex statistical information to pediatricians at a local hospital on the association between in utero exposure to pesticides and the healthy development of newborns.
- Develop a registry and participate in the enrollment of Iraq and Afghanistan veterans suffering from Post Traumatic Stress Disorder in collaboration with the Veterans Administration.
- Provide biostatistical support to community-based researchers in a range of areas including, but not limited to, sample size calculations and power analysis, research methodology, data management, and data analysis.

Environmental Health Sciences

- Develop a program that builds the capacity of health department personnel to implement new water monitoring standards.
- Conduct a community awareness program around recycling and use of sustainable materials.
- Apply GIS mapping technology to an environmental health problem that changes how the problem is addressed locally.

Epidemiology

- Develop and test new strategies of presenting complex epidemiologic information to community members.
- Develop and implement a "mixed methods" approach to studying how H1N1 is transmitted in the social networks of homeless youth.
- Perform secondary data analysis of large datasets to answer a public health research question.

Health Policy and Management

- Assess the organizational functioning of a non-profit organization and develop a plan to increase the organization's efficiency and effectiveness.
- Analyze a healthcare policy and develop and test strategies for its implementation.
- Conduct a community-wide health needs assessment (e.g., for health department accreditation).

Social and Behavioral Sciences

- Develop and test a social marketing campaign that reduces the tobacco use behaviors of college students.
- Plan, implement, and evaluate a school-based health education curriculum that reduces unintentional injuries.
- Develop and administer a survey to measure phenomena related to an important public health problem.

For additional ideas, please refer to the professional competencies of each discipline (see Appendix).

STUDENT RESPONSIBILITIES

The student has the primary responsibility of developing, conducting, and presenting the practicum project and ensuring that all requirements are met. To this end, the student is responsible for:

Development Phase

- Reflecting on completed coursework, identifying areas of interest for further study, developing a list of possible sites to conduct the practicum, and generating a preliminary list of learning objectives and activities to be reviewed and approved by the Practicum Instructor.
- Obtaining the approval of the Practicum Instructor before contacting potential field preceptors or community sites to negotiate a practicum project. The Instructor must secure a Site Agreement with the community organization before the student can begin the practicum project.
- Completing the Practicum Agreement Form and obtaining all necessary signatures before beginning the practicum project. **Time spent before approval of the Practicum Agreement Form will not count toward the minimum contact hour requirement.**
- Submission of the Preceptor's curriculum vitae (CV) or resume along with the signed Practicum Agreement Form.
- Enrolling in the appropriate Practicum Experience course (i.e., SBS 60192).
- Working with the Practicum Instructor to obtain Institutional Review Board (IRB) approval of projects involving data from human subjects. **You must have IRB approval before you can start any project that involves data from human subjects—whether you collected the data or not.**

Implementation Phase

- Completing the KSU-approved CITI training entitled, "Social & Behavioral Research – Basic/Refresher." Please note that this training must be completed before IRB approval can be given. Students that have completed the CITI training in the last three years can waive this requirement by submitting the training certificate to the Practicum Instructor.
- Completing all required aspects of the practicum project, as described in the Practicum Agreement Form.

- Behaving in a professional manner while completing the practicum project including appropriate attire, language, communication, and general appearance.
- Documenting the time devoted to the practicum project using the approved time sheet (see Appendix).
- Negotiating absences and make-up time directly with the field preceptor. Please note that the Kent State University holiday schedule does not necessarily coincide with the holiday schedule of the field site.
- Contacting the Practicum Instructor when problems arise including if the student is asked to do anything s/he finds objectionable, sign any documents, perform any clinical functions, or anything else that falls outside of the scope of the Practicum Agreement Form.
- Completing assignments/tasks given by the Practicum Instructor.

Final Phase

- Obtaining approval from the Practicum Instructor of a draft for the report/document that becomes the final practicum work product or narrative.
- Preparing the portfolio (see requirements).
- Obtaining approval from the Practicum Instructor to present the portfolio.
- Satisfactorily presenting the portfolio (see requirements).
- Completing all final requirements, including the Student Evaluation of Preceptor and Site form.
- The Preceptor must complete the Preceptor Evaluation of Student form and submit it directly to the Practicum Instructor.

PRECEPTOR RESPONSIBILITIES

The preceptor is located at the host agency and has the primary responsibility for providing a supportive learning environment for the student and evaluating the student's work. To this end, the field preceptor is responsible for:

Development Phase

- Meeting with the student to develop the practicum project.
- Discussing the Practicum project with the practicum instructor.
- Reviewing and signing the final Practicum Agreement Form (see Appendix).
- Submitting a resume/CV to the practicum instructor that includes professional experience, education, and certifications or licensures.

Implementation Phase

- Providing a safe and productive work environment for the student including a work area, computer, office supplies, or other items needed to complete the practicum project.
- Providing access to technical, laboratory, administrative, or other equipment needed to complete the practicum project.
- Signing time sheets (see Appendix).
- Maintaining an appropriate professional mentor relationship with the student.
- Supporting the student during the practicum project.
- Reporting any problems to the Practicum Instructor.

Final Phase

- Attending the portfolio presentation, if able.
- Completing the Preceptor Evaluation of Student (see Appendix) and submitting it to the Practicum Instructor.

PORTFOLIO REQUIREMENTS

Each student must complete several items as part of the final portfolio which summarizes the practicum experience. After completion, the portfolio will become a public document that resides in the department's library. The portfolio requirements vary by MPH specialization. See syllabus for more information.

Students are required to work closely with the Practicum Instructor on the development of the portfolio, including submitting drafts by the stated due dates.

The Practicum Final Work Product

A student has the choice of either selecting a research narrative or a work product such as a manual, handbook etc. The Practicum final product requirements may vary by MPH specialization.

The research narrative is a scholarly description of the Practicum project. If your Practicum entails a final work product for your organization, you are welcome to use that product instead of writing a separate narrative. It is your choice. For example, if you are doing analysis of a particular policy, collecting data, then actually revising existing policy or creating a new policy manual, that that policy document can be submitted instead of writing a narrative. See syllabus for more information.

Formatting Requirements of the Practicum Final Work Product

The practicum final work product must adhere to the following formatting requirements:

<i>Requirement</i>	<i>Description</i>
References	The citations and references must follow requirements stated in the "Publication Manual of the American Psychological Association" (sometimes referred to as the "APA Manual")
Type Face & Spacing	12-point Times New Roman (unmodified) double-spaced
Margins	1" margins all the way around (top, bottom, left, and right)
Header and Footer	No header. Place the page number <u>and</u> total number of pages in the lower right-hand corner of the footer (i.e., Page X of Y).
Tables & Figures	Tables and figures must be titled in a manner consistent with the APA Manual. Table data should be clearly presented using "Presenting Your Findings: A Practical Guide for Creating Tables"

Practicum Project Overview

The self-evaluation component of the Practicum portfolio is a short video where the student gives an overview of the Practicum experience with prior coursework and with the "next steps" in their careers. Sample questions to address in the overview include, but are not limited to:

- How did the Practicum help you master the competencies in the MPH program?
- How has your Practicum experience enriched your overall MPH program?
- How has the MPH program better prepared you for your "next step?"
- What "lessons learned" in regards to leadership style would you share with future MPH students?

PRESENTATION REQUIREMENTS

Students must publicly present and answer questions about their Practicum projects to other students, faculty, staff, their preceptors, and community members. The preceptor is encouraged, but is not required, to attend.

Students should prepare the presentation using Microsoft PowerPoint and include enough slides to fill 20 minutes. Students should be prepared to answer questions from the Practicum Instructor and audience for 15 minutes.

Students must receive approval from the Practicum Instructor before they can present their Practicum portfolios.

Date, Time, and Location

Students will establish a date and time to present the Practicum with the Practicum Instructor. The Practicum Instructor will secure the meeting location (online students will use Blackboard Collaborate Ultra, Skype, or other approved system).

Audio-Visual Equipment

Students are required to use the audio-visual equipment in the presentation room or reserve a laptop and projector from the College. If additional audio-visual equipment is needed, it should be secured by the student with the approval of the Practicum Instructor.

The PowerPoint presentation must be approved by the Practicum Instructor before it is presented.

APPENDIX A

Practicum Agreement Form

Note: This form must be typed. A fillable form is available on the College's web site.

PRACTICUM AGREEMENT FORM

Student/Practicum Information

Student's Name			
Practicum Title			
Dates of Practicum			
Hours Per Week		Total Hours	300

Preceptor/Site Information

Name of Site			
Site Address			
Preceptor Name		Phone	
Preceptor Title		Email	

Are you employed by this organization/agency? Yes* No

**If yes, please complete this section ADDED*

Employment Information

Job Title	
Supervisor	
Job Description and principal duties*	

* You may attach a hard-copy of this information, if available

Differences Between Practicum and Job Duties

Provide a justification for how the proposed practicum project is "above and beyond" the student's normal job duties.

--

Professional Competencies

Students must identify 5 professional competencies that align with the practicum project (see Practicum Guidelines Appendix).

Competency #	Description

Practicum Overview

Provide an overview of your proposed practicum. 1) Include background information on the agency in which you will be placed. 2) Where specifically you will be practicing within the agency? 3) What roles and responsibilities will you undertake? 4) Describe the final, written product that you intend to submit in partial completion of the practicum requirements (i.e. a work product such as a program/policy manual or handbook, or a research narrative)

Learning Objectives

Students must identify 5 learning objectives, the timeline associated with completing the objectives, the method(s) for completing the objectives, and what evidence will document the completion of the objectives. Begin the learning objectives with the following verbs: **define, describe, discuss, explain, identify, demonstrate, differentiate, compare, design, formulate, evaluate, assess, or analyze.**

Practicum Learning Objective	Competency #	Timeline	Method(s)	Evidence

Human Subjects Research

Does your project involve collecting or using information from a living individual in any way? This includes, but is not limited to: performing secondary analysis of existing data; reviewing existing records; conducting interviews, focus groups, or surveys; observing participants; and examining biological specimens. Yes* No

*If yes, you must work with the Practicum Coordinator to complete the appropriate Institutional Review Board (IRB) forms at Kent State University and receive approval before collecting or using human subjects data. IRB approval may also be required from partnering agencies.

NOTE: Major deviations such as content, description or objectives from this agreement require the completion and approval of a new form along with approval by the Practicum Coordinator.

Signatures

By signing below, the student and preceptor agree with the policies, procedures, and expectations stated on this document, the Practicum Guidelines document, and any associated syllabi.

Coordinator _____ Date _____ College _____ Date _____

Revised 3/2018

APPENDIX B

Professional Competencies in the MPH Program

Note: This form must be typed. A fillable form is available on the College's web site.

CORE COMPETENCIES

1. Conduct descriptive and inferential statistics according to the study design for answering particular research questions.
2. Develop written and oral presentations based on statistical analyses for both public health professionals and lay audiences.
3. Mitigate the direct and indirect human, ecological and safety effects of major environmental and occupational agents.
4. Apply federal and state regulatory guidelines to programs that control environmental health issues.
5. Identify the main issues related to the organization, management, financing and delivery of health services in the United States.
6. Recognize and critically discuss current and emerging public health issues on local, state, national and global levels.
7. Utilize and justify the social ecological approach to health promotion and disease prevention.
8. Design basic quantitative and qualitative research to address public health problems.
9. Describe how societal, organizational, and individual factors influence and are influenced by public health communications.
10. Implement public health programs and strategies responsive to the diverse cultural values and traditions of the communities served.
11. Use collaborative methods and ethical standards for achieving organizational and community health goals.
12. Apply epidemiologic methods to assess the risk of communicable and non-communicable diseases in the community.

DISCIPLINE-SPECIFIC COMPETENCIES

Biostatistics

- A1. Describe basic concepts of probability, random variation and commonly used statistical probability distributions.
- A2. Describe preferred methodological alternatives to commonly used statistical methods when assumptions are not met
- A3. Distinguish among the different measurement scales and the implications for selection of statistical methods to be used based on these distinctions
- A4. Apply common statistical methods for inference

Environmental Health Sciences

- B1. Describe factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards.
- B2. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety.
- B3. Explain the general mechanisms of toxicity in eliciting a toxic response to various environmental exposures.
- B4. Discuss various risk management and risk communication approaches in relation to issues of environmental justice and equity.
- B5. Describe basic biological principles that apply to public health.

Epidemiology

- C1. Identify the principles and limitations of public health screening programs.
- C2. Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues.
- C3. Comprehend basic ethical and legal principles pertaining to the collection, maintenance, use and dissemination of epidemiologic data.
- C4. Communicate epidemiologic information to lay and professional audiences.
- C5. Evaluate the strengths and limitations of epidemiologic reports.

Health Policy & Management

- D1. Describe the legal and ethical bases for public health services.
- D2. Discuss key elements of the policy processes and apply them to public health issues.
- D3. Apply the principles of planning, implementation and evaluation of public health programs and effectively communicate outcomes.
- D4. Evaluate the financial performance and management of public health organizations.
- D5. Apply "systems thinking" for resolving organizational problems.
- D6. Develop and demonstrate leadership skills related to a health policy and/or management concern

Social & Behavioral Sciences

- E1. Apply and evaluate basic social and behavioral theories that effect health behaviors.
- E2. Analyze the role of social determinants in the onset and solution to public health problems.
- E3. Use the principles of ethics, social justice and advocacy in improving the health of diverse populations in a culturally competent manner.
- E4. Analyze emerging social and behavioral issues and create evidence-based interventions.

APPENDIX D

Preceptor Evaluation of Student

PRECEPTOR EVALUATION OF STUDENT

The student's grade on the practicum is based upon the quality of the student's portfolio, the portfolio presentation, an overall assessment by the faculty, and your evaluation as the field preceptor. Please complete this assessment during the midpoint of the practicum project and when the practicum project is completed. Please submit this assessment directly to the Practicum Coordinator.

Mid-Point Evaluation

Final Evaluation

	Not Achieved	Barely Achieved	Adequately Achieved	Achieved Well	

Knowledge of Effective Public Health Practice

Indicate your assessment of the student's knowledge of public health practice on a scale of 1-5 (1=Poor 5=Excellent) by circling one number next to each statement below. Circle "NA" if you do not feel qualified to rate the item or if it does not apply.

	Poor	Fair	Average	Good	Excellent	
The scientific basis for public health	1	2	3	4	5	NA
Methods to assess and analyze health needs of the community target population	1	2	3	4	5	NA
Appropriate theories and models of behavior change	1	2	3	4	5	NA
Individual, small, and/or large group public health strategies	1	2	3	4	5	NA
Relevant public health policies and practices at the local, state, and national	1	2	3	4	5	NA
Community resources	1	2	3	4	5	NA
Models for designing and implementing public health programs	1	2	3	4	5	NA
Effective management practices such as planning, budgeting, marketing, and staffing	1	2	3	4	5	NA

Additional comments on the student's knowledge of effective public health practice:

Effective Public Health Practice Skills

Indicate your assessment of the student's public health practice skills on a scale of 1-5 (1=Poor 5=Excellent) by circling one number next to each statement below. Circle "NA" if you do not feel qualified to rate the item or if it does not apply.

	Poor	Fair	Average	Good	Excellent	
Able to identify problem/assess client interest and need	1	2	3	4	5	NA
Formulate educational/service goals and objectives	1	2	3	4	5	NA
Selects educational or service strategies to the situation	1	2	3	4	5	NA
Delivers service or educational program effectively to clients	1	2	3	4	5	NA
Makes optimum use of available service/resources	1	2	3	4	5	NA
Develops measures to evaluate program effectively	1	2	3	4	5	NA
Prepares appropriate reports/maintenance records	1	2	3	4	5	NA
Plans and organizes time effectively	1	2	3	4	5	NA
Accomplishes assigned tasks with a minimum amount of supervision	1	2	3	4	5	NA
Makes sound decisions, using good judgment and common sense	1	2	3	4	5	NA
Produces accurate, thorough work	1	2	3	4	5	NA
Expresses self well in oral and written work	1	2	3	4	5	NA
Follows policies and procedures	1	2	3	4	5	NA

Additional comments on the student's public health practice skills:

Relationships with Staff/Clients

Indicate your assessment of the student's relationships with staff and clients on a scale of 1-5 (1=Poor 5=Excellent) by circling one number next to each statement below. Circle "NA" if you do not feel qualified to rate the item or if it does not apply.

	Poor	Fair	Average	Good	Excellent	
Works harmoniously with colleagues	1	2	3	4	5	NA
Works harmoniously with staff	1	2	3	4	5	NA
Works harmoniously with representatives of other agencies	1	2	3	4	5	NA
Participates effectively with group situations	1	2	3	4	5	NA
Communicates effectively with clients	1	2	3	4	5	NA
Communicates effectively with staff	1	2	3	4	5	NA

Additional comments on the student's relationships with staff and clients:

Personal Traits and Attitudes

Indicate your assessment of the student's personal traits and attitudes on a scale of 1-5 (1=Poor 5=Excellent) by circling one number next to each statement below. Circle "NA" if you do not feel qualified to rate the item or if it does not apply.

	Poor	Fair	Average	Good	Excellent	
Possesses emotional stability and maturity	1	2	3	4	5	NA
Is mentally active and attentive	1	2	3	4	5	NA
Shows leadership qualities	1	2	3	4	5	NA
Shows interest and enthusiasm for assigned activities	1	2	3	4	5	NA
Recognizes own strengths and weaknesses	1	2	3	4	5	NA
Responds positively to supervision	1	2	3	4	5	NA

Additional comments on the student's personal traits and attitudes:

Potential

Indicate your assessment of the student's potential on a scale of 1-5 (1=Poor 5=Excellent) by circling one number next to each statement below. Circle "NA" if you do not feel qualified to rate the item or if it does not apply.

	Poor	Fair	Average	Good	Excellent	
Shows potentialities of becoming an effective site employee	1	2	3	4	5	NA
Has potential for contributing to profession	1	2	3	4	5	NA
Has potential for supervisory and administrative work	1	2	3	4	5	NA

Additional comments on the student's potential:

Overall Evaluation of the Student

Using the space below, please provide your overall evaluation of the student, including commenting on anything not previously mentioned.

What grade would you recommend? A A- B+ B B- C+ C C- D+ D F

Your Feedback On The Practicum Process

We routinely make changes to the practicum process to improve the experience for the students and our preceptors. Using the space below, please provide your feedback on this experience and note anything we can do better.

Preceptor Signature: _____ Date: _____

Thank you for serving as a field preceptor. Please send this form to the Practicum Coordinator:

Kent State University
College of Public Health
Lowry Hall, 3rd Floor
PO Box 5190
Kent, OH 44240

publichealth@kent.edu
www.kent.edu/publichealth
Fax: 330-672-6505
Tel: 330-672-6500

APPENDIX E

Student Evaluation of Preceptor and Site

STUDENT EVALUATION OF PRECEPTOR & SITE

We also would like feedback from students on the preceptors and practicum sites. Please submit this assessment directly to the Practicum Coordinator. It will not be shared with the preceptor or practicum site.

Student, Preceptor, and Site Information

Student's Name	
Practicum Site	
Preceptor Name	
Dates of Placement	

Project Feedback

Please provide a general description of the duties and responsibilities you had during your practicum.

What experience(s) were most helpful? Why?

What experience(s) were least helpful? Why?

Preceptor and Site Feedback

How would you describe the supervision and guidance you received from your preceptor and the site?

What feedback do you have to improve the practicum experience at this site?

Would you recommend other students use this host site? Why or why not?

Additional Feedback

What additional feedback do you have about how to improve the practicum experience for students?

Thank you for your feedback. Please send this form to the Practicum Coordinator:
