Working with Notebook Software Gallery Collections

What is the Notebook software Gallery?
The Notebook™ software Gallery helps you quickly develop and deliver lesson activities and presentations in rich graphic detail. Thousands of high-resolution images, audio, video, Adobe® Flash® and entire Notebook files are organized into searchable collections that allow you to create attractive, reusable content.
Searching for Gallery content

There are two ways to find Gallery content: browse through the Gallery Collections and select a category, or enter a keyword into the search field as you would when using an Internet search engine.

If you were building a mathematics lesson activity about shapes, for example, you may decide to browse by topic for all Gallery items relating to Shapes, Space and Measure. However, if you were looking for a specific shape in the middle of class, you may want to type the keyword triangle into the search field to save time.

To look for Gallery items using the search field, do the following:

1. Press once inside the search field
2. Type a keyword related to the type of object(s) you are looking for
3. Press the Search button to display your results

**TIP:** Press the icon to the right of the search field to use the On-Screen Keyboard to type your keyword.

Viewing search results

Search results display as thumbnail images that match your search criteria. These thumbnail images, or Gallery items, are organized into four content types: Related Folders, Pictures and Backgrounds, Interactive and Multimedia, and Notebook Files and Pages.

If you search for the keyword triangle, for example, Related Folders will display all Gallery items associated with the keyword, providing you with additional content to help supplement learning activities. Double-press a folder thumbnail to view its contents.

The thumbnails displayed in Pictures and Backgrounds include clip art and photographs. Drag an item to the work area to use it as part of a lesson or to modify its properties.
