

Anne Leopold, M.Sc., is a Disability Research Analyst with JBS International, Inc. Ms. Leopold has provided support for and led multiple research projects, including the Vietnam Head Injury study, at the National Institutes of Health. Ms. Leopold has extensive experience working with people with a variety of disabilities, including TBI. In the Vietnam Head Injury Study, she conducted assessments of participants' level of functioning, administered study questionnaires and testing materials, and analyzed outcome data utilizing quantitative methods. Ms. Leopold has authored and co-authored several scientific journal articles on TBI. Through her graduate and post-graduate training and professional experiences, Ms. Leopold has gained expertise in quantitative as well as qualitative research design and data analysis.
