DIFFERENCE BETWEEN STUDIES AND SCIENCE

- **Environmental Studies** is a social science that looks to how humans influence and are influenced by the environment, and how traditions of cultures around the world affect the environment. It examines the social and political aspects of how people and the natural environment have interacted and continue to interact with one another.
- **Environmental Science** focuses mostly on the biological and chemical aspects rather than the social and policy aspects of various environmental issues.

TOPICS OF INTEREST

- 
- ADVOCACY!
 - Climate Change
 - Recycling and Waste
 - Sustainable Cities (urban gardening, urban heat island, planning and zoning, transportation)
